ISRAEL & IRAN SCUFFLE AND THE BIGGER PLAY- EYEBALLING CHINA'S *IRREGULAR WARFARE* AND MULTI DOMAIN *ASYMMETRIC TACTICS* ?

Jesse's Notes on the Matter

Introduction

The surest way to prevent a war is to be prepared to win it; however, the military's role in Great Power competition (GPC) must be more than just serving as a credible deterrent. Having roughly 10 times the Department of State's annual budget and more than 30 times the personnel, the military plays an integral role as a global counterbalance to the People's Republic of China (PRC), the pacing threat. China's strategy is to defeat the U.S. military by other means, to win without fighting.

As Sun Tzu counseled, "To fight and conquer in all your battles is not supreme excellence; supreme excellence consists in breaking the enemy's resistance without fighting."Current Department of Defense (DOD) strategy defines success in competition as deterring conflict on favorable terms, limiting adversaries' actions to expand the competitive space short of armed conflict, and enabling the rapid transition to armed conflict should deterrence fail. The problem DOD's current preparation for conflict centers on outdated premonitions of war, with adversaries exploiting fundamental U.S. misconstructions to their advantage.

As Lieutenant General H.R. McMaster, USA (Ret.), stated, 'there are two ways to fight the United States: asymmetrically or stupidly. In the era of GPC, there will be no neatly declared war between nation-states, and all hybrid conflicts will range from violence by proxy to the use of conventional forces. Moreover, DOD is facing fundamental changes to the character of war with technological advances in precision munitions, information technology, hypersonics, cyber warfare, robotics, and artificial intelligence. The country that masters new technology and considers ethical implications for proper legal authority will have a decisive advantage—at least initially—for all future conflicts. Part of regaining the initiative is a recognition of this change in the operating environment; however, the joint force must do more to prepare for its role in GPC beyond deterrence.'

To better understand the United States' strategic shortcomings of the recent past, and understand why we are at the current stage of being on the precipice of war with China, who currently threatens U.S. world supremacy. We must first identify, analyze, adjust course, and maneuver. In my field it's more commonly referred to as following John Boyd's OODA loop scheme. Observe, Orient, Decide and Act. However, if we continue to have blinders on, the failures will compound and result in catastrophic loss and irreparable defeat.

This paper is written from the point of view of a CONUS battlefield commander,Sheriff, Police Chief , Security Manager, Counter-Terrorism or SOLIC Analyst or CounterInsurgency

Analyst. This paper is written from the perspective of a, 'wide angle glimpse- whole of picture' threat landscape, with a military Multi-Domain outlook, focusing primarily on the United States and China, as two central battlegrounds for primacy , within an asymmetric informational, psychological. politicized, Irregular war scenario. The opinions contained herein are that of the authors and only his with caveat some may be based on his theory or that of others . In such cases credit is given. All other information is factual and to the best of my knowledge is either fact checked, hyper-linked to source, noted with source etc. None of these opinions reflect endorsement of those of the CIA,CTG, DOD, DOE, DOS, DTRA, or MDA or unless otherwise noted.

Our most glaringly obvious, and detrimental failure, is our inability to fully understand and recognize the threat posed by the PRC. We continue to fail at recognizing their peacetime and war doctrines that are setting the battlefield stage and Operational Environment for this great competition that's been going on for ages, but given what's at stake has been redefined as the Great Power Competition.

China has strategically aligned with other like minded enemies of the U.S namely, Iran and Russia, North Korea and Cuba in a grand effort to force multiply their subversive efforts, and to increase diplomatic and geo-political pressures within the whole scenario. PRC also has strategic alignment with the members of the U.N, WEF, WHO and other globalist entities that similarly align ideologically. As a result of these strategic alliances, the U.S. is wholeheartedly at risk of losing its superpower hegemony to an eager PRC working essentially to overthrow the United States.

The US needs to fully redefine its engagements with the rest of the world and specifically within the US and China relationship.

*'Globalism is a replacement ideology that seeks to reorder the world into one singular, planetary Unistate, ruled by the globalist elite. The globalist war on nation-states cannot succeed without collapsing the United States of America. The long-term strategic attack plan moves America incrementally from constitutional republic to socialism to globalism to feudalism. The tactical attack plan uses asymmetric psychological and informational warfare to destabilize Americans and drive society out of objective reality into the madness of subjective reality. America's children are the primary target of the globalist predators-**By:** Linda Goudsmit | pundicity-Re-published TrevorLoudon.com*

The aforementioned statement could not have been more true or anymore crystal clear.

As per U.S Army and Joint Special Operations Command (JSOC) assessments, ‘Adaptive adversaries such as terrorists, insurgents, and criminal networks as well as states will increasingly resort to irregular forms of warfare as effective ways to challenge conventional military powers. Advances in technology and other trends in the environment will render such irregular threats ever more lethal, capable of producing widespread chaos, and otherwise difficult to counter. These threats are enmeshed in the population and increasingly empowered by astute use of communications, cyberspace, and technology, such that their impact extends regionally and globally. Many of these conflicts are essentially contests for influence and legitimacy over relevant populations.’

Per the Red-Team Handbook Version #9, “The Army Guide to Making Better Decisions”, Preface- ‘Chief of Staff of the U.S. Army General Mark A. Milley repeatedly warns of increased complexity, ambiguity, and speed in future warfare. The decision-making process at all levels of command will be challenged by the environment, the situation, and the enemy, as well as by the perception and interpretation of our thoughts. The requirement to frame decisions around the scope and rate of information sharing on the modern battlefield and adapting those frames to the complexity of context and content,
necessitates the ability to think critically and creatively.

SO WHAT IS IRREGULAR WAR & GRAY-ZONE CONFLICT

I, like many, have felt a sense of uneasiness for some time. I think it’s safe to say I have felt this way since before the October 7th, 2023 attack on Israel by Palestinian based, U.S.designated, foreign terrorist organization, Hamas and by proxy the Iranian regime. Here we are 11 months later and things are just now escalating again. Hezbollah has provided some minor support firing rockets into the North of Israel at times, but overall they’ve stayed out of the current conflict only playing a support role to Hamas, who has been systematically decimated by the Israeli Defense Forces (IDF) on the main battlefield and its leadership is being hunted throughout the world by Mossad and Shin-Bet intelligence services.

Diplomatically, the Biden administration’s approach to the Middle East has been criticized for being weak and ineffective. The administration’s attempts to re-enter the Iran nuclear deal have been met with skepticism and resistance from both allies and adversaries in the region. The lack of a coherent and effective strategy to deal with Iran’s aggression towards Israel could further

strain relationships with critical allies in the area, such as with Qatar, Turkey, Jordan and Saudi Arabia and Egypt.

Internationally, the Biden Administration's handling of the Iran attack on Israel could also have negative repercussions. The administration's inability to effectively address the situation could lead to a loss of credibility on the global stage.

'Furthermore, the military leadership under the Biden Administration has also been questioned. These handpicked admirals and generals, are much more concerned about Diversity, Equity and Inclusion (DEI) in addition to their rank and career advancement.They lack the fortitude needed to handle a crisis of this magnitude effectively. Without strong military leadership, the United States will continue to struggle to respond effectively to threats from adversaries such as Iran, North Korea, China, and Russia.Without a solid and effective diplomatic and military strategy, the United States and our allies may risk further destabilization and conflict in several regions.'

'China's *gray zone* conflict. Russian *hybrid* *warfare.* These terms have emerged to describe belligerent activities that standard US military operations struggle to address. Although these adversarial approaches remain central to today's security environment, they are absent from the current joint doctrinal framework. Even the new joint doctrine note on strategic competition (JDN 1-22) fails to address hybrid warfare at all and there is only one mention of the gray zone. In fact, these two methods of conflict should remain front and center. Since the inception of joint doctrine, the United States has generally envisioned conflict in a linear fashion where peace and full-scale war occupy opposite sides of a continuum, with varying degrees of each in between. Doctrine's evolution has made little change in this concept of a conflict continuum over time.'

What does appear to be agreed upon is that the GRAYZONE primarily takes place within the **HUMAN DOMAIN**.

'One demonstration of how we can assess the human domain used a similar survey analysis approach to categorize leading indications of state-based, **UN *Article 2 threshold of aggression.***

The kinds of activities that likely precede state actions to forcibly attain national objectives through ambiguous conflict, opaque actors, and uncertain legal frameworks include the following:

1. **Unconventional Measures: tactics short of conventional war to coerce, destabilize, or overthrow a government.**

a. Use of persistent, low-level actions across the physical, cognitive and moral frames to desensitize observers of future action.

b. Use of clandestine and covert intelligence and special operations elements to conduct Preparation of the Environment and other activities.

c. Increased activity within the human domain to "hide" campaigns "in plain sight."

2. Non-Military Measures: political, economic, and diplomatic means to create positional advantage in regards to time, forces, relationships, ideas and geography.

a. Development of political/economic ties to nations, key officials and/or the private sector within the area of interest.

b. Employment of targeted political/economic ties toward campaign objectives.

3. Leverage Population-based Power: influencing and mobilizing groups to action.

a. **Use of aggrieved/exploitable population segments to potentially "host" follow-on forces.**

‘Perceiving Gray Zone challenges requires the capacity to identify, understand, and synthesize complex elements in context. The synthesis requires a fusion of intelligence, information, and operational knowledge to provide the holistic view.’

b. Increased activity of the targeted population directed toward campaign objectives

4. Information Measures: messaging and propaganda for deception and denial to set conditions for follow-on action.

a. Use of macro/micro narratives to provide pretext for future action

b. Increase in public opinion and propaganda efforts to foster ambiguity and misdirection toward the nature, scope and duration of unfolding campaign

5. Lawfare Measures: self-identified legal frameworks and processes to advance interests and coerce or compel others.

a. Declaration of intent based on legal premise to take action.

b. **Expansion of territory based on caveat, national law or precedent.**

6. Technology Measures: the use of existing and new technologies in standard and non-standard ways including the use of: Cyber, Unmanned Aerial Systems, basic and

advanced weapons, such as precision munitions, robotics, and CBRN.

a. The use of cyber domain to conduct recruitment, finance operations, operational planning and propaganda.

b. **The use of cyber-domain attacks against civil, military, and governmental targets.**

7. Conventional Military Measures: the employment of conventional forces to support strategic objectives by employing capabilities including Combined Arms Maneuver, Wide Area Security, Show of Force, Deception, Denial and Incursion.

a. **The conduct of large scale Conventional Force exercises near a potential cross-border area of operations.**

b. Increased deployment of Conventional Forces, positioned in a country by formal agreement to expand capabilities in pre-existing bases.

Ultimately, a view through some form of Human Domain Model or design methodology will enable a fused effort of multiple disciplines working together to anticipate the trajectories of emerging problems. Through iterative assessments and feedback mechanisms, they could adjust that hypothetical trajectory over time.

The U.S. must develop a new form of discovery for the Gray Zone, one that uncovers the existence of patterns in order to assess their larger meaning. We must be able to detect our adversaries' efforts of cognitive maneuver as manifested by observable or detectable indications and thereby provide warning of the subsequent effects within the Human Domain.

Establishing what the Gray Zone is more specifically points observers toward particular kinds of activities to assess changing security patterns. If we consider the opening premise as valid, ***that trends in international competition are converging for relative superiority, then the place where those trends compete is in the Human Domain.***

'We should look there to find previously unknown patterns and emerging security challenges. What, then, are we looking for? This is a critical question because it rests on the assumption that actors are the key component of human domain security challenges. This assumption is premised

*on the notion that **disruptive actors pursue non-normative interests**. Those actors need a certain measure of capacity to act on their motives.'*

Ideological, economic, value, and power interests drive motives. In other words, the strength of an actor's ideas coupled with their capacity determines the potential velocity with which they choose to pursue underlying motives. This is predicated on existing conditions, such as political, economic, social, and environmental factors.Those conditions provide mass for an actor's influence. The relationship between motives and conditions is symbiotic; one is a function of the other. Neither is independent.

***The latent variables of motive and conditions are what USSOCOM refers to as the potential energy in the international system.** In order for that potential energy to emerge as a true security challenge, there must be a pretext for action. Actors seek or wait for opportunities through which they may seize an initiative.*

Opportunities include legal actions, economic tension, and socio-political disruptions. Depending on the context of the conditions, potential actors use mechanisms or triggers to generate momentum for their motives. These triggers are how actors pursue their interests. They are the variety of cognitive maneuvers, moral influences, and physical controls that determine the trajectory of a security challenge.

A Human Domain Model that comprises the aforementioned elements is one of the principle consistencies characteristic of Gray Zone challenges (Figure 2). It frames how to view the Human Domain to synthesize interrelated aspects and perceive seemingly unnoticeable currents. ***Viewing the Human Domain in this way, how could one observe the operational environment to either anticipate gray zone challenges or understand the nature of an existing challenge?***

The Human Domain - Maneuver in the Cognitive Space

Drawing the line between history, theory, and doctrine unveils an important principle of strategy that the post-modern military theorist, ***Colonel John Boyd, emphasized: "The central theme [of strategy] is one of interaction/isolation while the key ideas are the moral-mental-physical means toward realizing this interaction/isolation."***

Boyd demonstrates that interacting with the environment, through cognitive approaches to influence the moral dimension, is mostly a competition in the Human Domain.

As the Russian actions leading to the annexation of Crimea show, they reveal maneuvers in the cognitive space for influence of Crimean moral and cognitive security, which transcends to their physical security. ***Similarly, GEN Joseph L. Votel, Commander of USSOCOM, described the contest in Gray Zones as, —a battle for the willingness of the people, the populations that are affected by it, the actors that are orchestrating it, the neutrals that are on the sidelines on this and it really is a struggle for influence with those different audiences."***

As the Gray Zone environment is characterized as one where influence serves as a significant instrument, it suggests that achieving influence could come about through an applied understanding of the elements associated with the Human Domain. ***It speaks to an approach that operates not in physical terrain but in a cognitive space, through people and populations.*** *It resembles what Dr. Henry Kissinger noted in 1955 was an* ***—immediate task [to] shore up the indigenous will to resist, which in the gray areas' means all the measures on which a substantial.***

Strategic indications and warnings in the Gray Zone contain challenges in determining intentions because of the ambiguity of the environment and the inherent difficulty in assessing perceptions from multiple actors. Hence, we will need the requisite data and level of analysis to discern intent behind the capabilities. consensus seems to exist: a political program to gain the confidence of local populations and to remove the stigma of colonialism from us.\72 ***This***

suggests that a planned, organized, and managed approach to this effort could be seen as a strategy of deliberate steps in a form of new
maneuver, namely maneuver in the cognitive space.

The U.S. will need to move from simply observing and calculating physical capabilities to also observing, perceiving, and understanding the physical, cognitive and moral aspects within the Human Domain. This further requires expanding our concept of maneuver beyond the physical to include the moral and cognitive spaces. *The growing trans-regional aspects of competition and conflict require new thinking about how we see and understand indications. We can no longer view them solely in regional frameworks.*

GAZA POTENTIAL U.S. BATTLEFRONT

Recently, Israeli military aircraft accidentally struck the Iranian consulate located in the Mezzeh district of Damascus, Syria, consequently killing sixteen (16), three (3) of which were top IRGC Commanders, so far Brigadier General Mohammad Reza Zahedi, a senior commander in the Quds Force of the Islamic Revolutionary Guards Corps (IRGC) and his deputy General Mohammad Hadi Hajriahimi were killed. Additionally, five (5) Iranian officials were killed: Hossein Aman Elahi, Sayid Mehdi Jalalati, Ali Agha Babaei, Sayid Ali Salehi Roozbahani, and Mohsen Sedaghat.[28] Zahedi was the most senior IRGC officer to be killed . Iran's Islamic Revolutionary Guard Corps (IRGC) plays a central role in orchestrating military operations and shaping Iran's regional strategy.

Israel, with its advanced military capabilities and close ties to Western powers, remains a key player in the Middle East. The involvement of the United States, the United Kingdom, and France in supporting Israel's defense underscores the international dimensions of the conflict.

It's kinda laughable to think this was an accident. The building structure that was actually targeted was an annex or compound, located immediately adjacent to the main consulate building. Iran had swore they would seek revenge very soon. Today, Iran made good on their threat and launched an air assault campaign early this Sunday, using an arsenal of drones,

ballistic missiles, and cruise missiles, which was an expected move that has escalated long-standing tensions in the Middle East.

Over 300 projectiles were fired in the attack,170 armed drones, 30 cruise missiles, and 120 ballistic missiles, several were intercepted. This signals a severe escalation in the conflict between these two countries, at least I wish it was just between them. Our Commander in Chief Joe Biden had asked Iranian Ayatollah Ali Khomeini not to hit Israel, but we all know the U.S. as a superpower under Joe's authority has no real power or influence, especially with nations that fund and export terror like Iran. The missiles that did get through 'systems', like Iron Dome, occurred at a sensitive strategic and tactical intelligence site. According to Scott Ritter (Iran specialist & Hamas sympathizer), this site is a strategic intelligence site that is specifically responsible for detecting incoming Iranian missiles and threats from Syria. The site focuses on a specific geographic area of responsibility (AOR). The site has multiple electronic radar defense platforms setup in concert with anti-aircraft, and anti-missile defense batteries such as the THADD system, David's sling developed by Rafael Advanced defense and Raytheon. "David's Sling has been developed as a flexible, multipurpose weapon system capable of engaging

multiple aircraft, cruise missiles, ballistic and guided missiles. DS uses the *Stunner* interceptor missile which is designed for land-based, maritime, and airborne applications and is outfitted with dual-band imaging infrared and radio-frequency seeker, as well as a multi-pulse rocket motor enabling all-weather operation. David's Sling was designed to target incoming missiles during their terminal phase, unlike the Iron Dome, which intercepts missiles at their highest trajectory. "In August 2008, the US and Israel began production of the Arrow-3, which consists of an exoatmospheric interceptor and proportional navigation to directly target an incoming missile outside of the earth's atmosphere, thereby preventing collateral damage from impact with a nuclear warhead."

The newest Israeli version of the Raytheon/Hughes Aircraft Patriot missiles is set to replace the four-missile stationary launcher with a 16-missile launcher, which will make it better equipped to contend with a prolonged barrage of missiles. Israel is also using the Raytheon/MoD **'Iron Beam'** system that is designed to destroy short-range rockets, artillery, drones, and mortars; it has a range of up to 4.3 miles, too close for the Iron Dome system to intercept projectiles effectively. Iron Beam uses a fiber laser to destroy an airborne target within 4–5 seconds of firing.

They utilize several other defense systems that track and target; Aerial platforms and munitions, including aircraft, helicopters, unmanned aircraft, and sea-skimming missiles.This Israeli defense site also has two tactical aircraft runways, one of which was targeted and hit despite all the vast defenses and countermeasures. **This is Iran's way of warning Israel that it is much more vulnerable than they think.** The runway has since been repaired. As I finish this up today. Israel responded to Iran's strike at 04/18/24 1700 hrs PST. Iran has not provided the media with a preliminary damage assessment all night or day. Almost total media black out and it's now 1900 the following day . Some reports indicate all responses are pre-determined so as to not start a conventional WW3.

<u>There is internal reporting that suggests U.S Special Operations Forces USSOF) are waiting on standby to respond to Gaza. A quick reaction force (QRF) is likely staged in Qatar.</u>

According to a 2010 Army publication . **‘The Army can expect that Large Scale Combat Operations (LSCO) dispatched to multiple theaters, will be characterized by multidomain threats on an increasingly transparent and lethal battlefield across multiple theaters. Our adversaries will capitalize on the democratization of technology and advances in robotic and cyber systems to confront the U.S. Army in every domain—land, air, sea, space, and cyberspace.**

Areas the Army once considered safe or guaranteed—**including the Homeland**, logistics, air superiority, sea control, and theater access—**will no longer be able to be taken for granted**. The Army will need to fight over extended distances to provide protection, time, and resources to sustain LSCO. The increasing role of information, unmanned systems, and potential WMD employment will add to the complexity of armed conflict. U.S. adversaries will continually challenge the U.S. Army’s ability to gain and maintain information advantage on and off the battlefield. Uncrewed systems that are increasingly inexpensive and widely available will provide adversaries with an array of capabilities, from ISR targeting to supporting urban and subterranean operations.”

The paper further states that LSCO will face many or any combination of the following conditions within Multi- Domain theaters. This particular analysis takes into account China’s employment of Unrestricted Warfare.

Reference: Operational Environment 2024-2034: Large-Scale Combat Operations32

LSCO Condition

All-Domain Competition and Warfare:

LSCO will feature all-domain competition and warfare as competition and conflict extend beyond physical battles and increasingly involve multiple interconnected domains and dimensions.

Anti-Access/Area Denial:	**Proliferation of Uncrewed Systems:**
In LSCO, U.S. Forces will face adversaries' anti-access/area denial efforts focused on denying our deployment into theater and preventing our freedom of action once deployed.	The increase in the production, employment, and success of uncrewed systems means the Army can expect to encounter these systems across the breadth and depth of LSCO.

Homeland Defense:	**Transparent Battlefield:**
LSCO will feature Homeland defense requirements as adversaries will have conventional, hybrid, and irregular capabilities to conduct operations against the Homeland.	LSCO will be marked by the democratization and proliferation of advanced technologies and hyper connected global communications, creating an increasingly transparent battlefield that makes it difficult to hide from the enemy.

Information Advantage:	**Mass vs. Precision:**
The ability of adversaries to rapidly influence the information and human dimensions will challenge the Army's ability to achieve information advantage in LSCO.	Mass and precision complement one another in LSCO, and combatants will need to identify the right mix of these factors to gain advantages.

Contested Logistics: The increased logistics requirements of LSCO will challenge Army sustainment operations, and adversaries will target those same operations from the Homeland to the battlefield.	**Magazine Depth and Range:** LSCO will require firing and sustaining massive amounts of munitions against adversaries likely to enjoy the initial advantage of interior lines, challenging the Army's magazine depth and range

Dense Urban Warfare: An increasingly urban OE means LSCO will include dense urban warfare in environments with challenging warfighting conditions.	**Weapons of Mass Destruction:** Adversaries view WMD as an asymmetric advantage that has an outsized impact on U.S. operations and will likely seek to employ WMD in LSCO

Increased Lethality:

LSCO will be increasingly lethal due to the intersection of sensor ubiquity, battlefield automation, precision strike, and massed fires.

UKRAINE PROXY BATTLE FRONT

Totally avoidable war. NATO has been increasing encroachment on Russian territory for years. Had Biden not pulled out of Afghanistan the way that he did, abruptly, abandoning our own people, our allied Afghans, Interpreters, 80 + billion in equipment such as, weapons, rockets, mortars; soft/thin skin vehicles, machinery; helicopters, Biometrics software and hardware with associated databases, several CIA bases and outposts with tons of classified intelligence on high value targets HVT and curated demographic profiles, potentially billions in Lithium and other natural resources, and of course, Bagram Air Base situated 100 miles from Mainland China's nuclear weapons assembly plant and other strategic and tactical targets. Knowing President

Biden is highly likely a compromised captured elite, one must ask himself, did the CCP specifically request he abandon Bagram, after recklessly and hastily leaving Afghanistan, like an extra perk for Xi Jinping?

WHO IS STIRRING UP ALL THE TROUBLE?

I frequently have to step back and ask myself who gains the most by waging war or by instigating World War III ? Pretty much everyone I'd say. ' We the people' of the United States are funding the Ukraine, Russia conflict. We are also funding the Israeli/Hamas conflict, and I don't mean indirectly. We just freed up $6 billion that was frozen for Iran to use and fund their attacks on Israel and I hear 80 billion more. We are now providing an extra $26.3 billion, $17 billion for Israel and $9 billion for Hamas or the people of Gaza. The Biden admin has not even been enforcing existing sanctions against Iran. We send millions to the Gazans who have duly elected Hamas as their government representatives since 2007. Over 87 percent of Gazans pledged full support for Hamas' terrorist actions on October 7th. Although this money is meant for the people of Gaza, Hamas spends those funds on more weapons and artillery for more terrorist attacks. For decades, annually, we send funds to the Israeli government and are constantly upgrading their land based missile defense systems and other defense programs. Reminds me, while on assignment at Raytheon in a Plant Protection capacity, for at least 10 years, twice a year or more, we would have an entourage of Israeli customers, usually military attache' or other Israeli government representatives come to the California facility to visit us and to complete a program inspection or review.

In my capacity overseeing physical security Plant Protection Operations, I had the responsibility at times of enforcing the government required 'technology control plan' (TCP) which consisted of providing shoulder to shoulder escorting of these high level foreign national visitors per DOD protocol. I had a unique view. Some of their military officers and attaches are easy going, others display perceived bad attitudes. We had, and likely, still do, have several defense related contracts with the Israeli Air Force as I medically retired in 2019. I became quite accustomed to

their modus operandi as they would frequently employ several methods of tradecraft, by attempting to collect information for intelligence purposes, while on their visits at the facilities. Yes, it's not often mentioned or portrayed in the Hollywood movies, but even our friendly, allied countries whom we are delightfully hosting, will try their best and gather any intelligence they can, even on their non-adversarial defense industrial colleagues. Of course they throw a fit when they get caught in their shennanigans.That's my experience with the Israelis in government.

Anyway, I firmly believe after listening to and reading the books of retired Air Force Brig. Gen. Robert Spalding, Mark Stokes, China experts like Gordon Chang, Nicholas Efitemades, Anna Marie Brady, Peter Schwietzer, Peter Navvaro, Shannon Brandao, The Jamestown Foundation, Heritage Foundation and many other scholars & think tanks, that ultimately, China is highly likely to be pulling several puppeteer strings here. Iran being the primary in the region is beholden to China especially after striking several lucrative oil trade deals that no doubt have strings attached. Under a draft of the 25-year agreement (signed on 24 June 2020 in Beijing) previously obtained by The New York Times, China is to invest **US $400 billion** into Iran's economy over a time period in exchange for a steady and heavily-discounted supply of oil from Iran. In my opinion, it's highly likely that China had a side deal with Iran for Hamas to attack Israel, reasoning is four fold; 1) To distract the U.S, by providing an additional conflict theater requiring our attention, while exhausting economic and military resources, such as surplus and stretching defense industry output capabilities 2) Anticipating an over-responsive military reply from Netanyahu/Israel, as we've seen, putting the U.S and Israel on the world stage as bloodthirsty warmongers. 3)The third portion of this is for MB/Hamas & Hezbollah and other militant jihadi groups designated as foreign terror organizations (FTO), to regain international notoriety, whilst shining bright attention and collecting world sympathies to the Palestinian cause. 4th) Fourth, but not least, to garner legitimacy for Hamas and bring them to the negotiation table, thus bringing China to the head of the table to negotiate on diplomatic affairs and be the new facilitator of peace. This allows China to demonstrate and put on full display its worth as a super-power player in the New World Order .

UNITED FRONT WORKERS DEPARTMENT

The purpose of the CCP's United Front Work Department is to exercise political influence abroad. The United Front has been reenergized in recent years. The CCP's United Front system operates both inside and outside China "to mobilize the party's friends to strike at the party's enemies". It exerts Chinese influence within foreign political parties, diaspora communities, colleges and corporations, all with the goal of promoting the party's interests by co-opting local organizations.

According to Influence Watch, an organizational watchdog group the **"UFWD has been called an "external intelligence organization" of China and its officials often reportedly operate under diplomatic cover as members of the Chinese Ministry of Foreign Affairs. [3] Shi Taifeng, an ally of paramount leader of the People's Republic of China Xi Jinping and member of the Chinese Communist Party's decision-making Politburo is UFWD's director.'**

According to the UCCC , "China uses what it calls "United Front" work to co-opt and neutralize sources of potential opposition to the policies and authority of its ruling Chinese Communist Party (CCP).

'The CCP's United Front Work Department (UFWD)—the agency responsible for coordinating these kinds of influence operations—mostly focuses on the management of potential opposition groups inside China, but it also has an important foreign influence mission. To carry out its influence activities abroad, the UFWD directs "overseas Chinese work," which seeks to co-opt ethnic Chinese individuals and communities living outside China, while a number of other key affiliated organizations guided by China's broader United Front strategy conduct influence operations targeting foreign actors and states. Some of these entities have clear connections to the CCP's United Front strategy, while others' linkage is less explicit.

'Every CCP leader from Mao Zedong to Xi Jinping has endorsed its importance for helping the party achieve the "Great Rejuvenation of the Chinese Nation," which includes unifying with

Taiwan and establishing a ***new global order*** that revolves around CCP values and interests and not those of western society..

'United front work also is a personal priority of Xi Jinping, and a member of the CCP's highest decision-making body, the Politburo Standing Committee, leads the united front system.'

'United front work damages U.S. interests through legal and illegal technology transfer, surveillance of Chinese diaspora communities, promotion of favorable narratives about the PRC through ostensibly independent voices, and the neutralization or harassment of critics of the CCP. The United States has no direct analogue, and the U.S. Government has struggled to counter united front work with traditional counterintelligence, law enforcement, and diplomatic tools.'

Organizations such as **Chinese Students and Scholars Associations** are less directly tied to the main United Front-related organizational structure, but many of their activities and acceptance of oversight from the CCP shows some level of guidance from the United Front strategy.'

According to a report written by China specialist **June Teufel Dreyer** at FPRI, "In the United States, the CSSA vigorously protested the University of California at San Diego's invitation to His Holiness the Dalai Lama to give the 2017 commencement address, with an interviewer for the *Voice of America*—a U.S. government-funded organization—asking this author if she did not think it reasonable that, because Chinese students "paid so much money to the United States [sic]" that their wishes be respected.'

According to a Jamestown Foundation report the total Budget of the Central Government's United Front System is at least $1.4 billion, likely more than $1.8 billion.

Where the PRC and communist party fit into this aspect I'm not exactly fullproof, perhaps organized, stateside positioned, enemy military ground assault teams, easily assembled from imported PRC, and

military trained illegal immigrants. This is why it's a good time to discuss the ***UNITED FRONT because this is likely the connection****.*

The worldwide protests that are occurring around the globe, in support of Gaza and Hamas, are all seemingly interconnected, possibly commanded by, albeit coordinated events by U.S based Hamas representatives like Council for American Islamic Relations (CAIR), Palestinian Youth Movement (PYM), Students for Justice in Palestine (SJP)(200 SJP chapters), Muslims For Palestine, Americans For Justice In Palestine Educational Foundation, U.S. Palestinian Community Network (USPCN), USCPR, National Students For Justice In Palestine + Chapters, ISNA , Muslim Students Association (MSA), and after deep investigations, hundreds of other similar organizations all hiding under the cover of, or behind the front of, Islamic charity organizations and under 501-(c)3 protections. 'All of these organizations openly support Hamas and the agenda of the Global Islamic Movement'. Backing these charity groups are other social/gender/racial justice groups, such as the group **CODEPINK**, #StopCopCity, **Jane's Revenge**; #ShutDownDC, #DefendATLForrest, **Unity of Fields** (formerly Palestine Action) the, **Chinese Progressive Association (**CPA), Freedom Road Socialist Association (FRSO), Liberation Road, Asians 4 Black Lives, American Muslims for Palestine (AMP), **Black Lives Matter** (BLM), Black Futures Lab (BFL), Left Roots (LR), **Chinese Association for International Friendly Contact** (CAIFC), Democratic Socialist of America (DSA), United Front Workers Department (UFWD) and can't leave out the obvious, **Communist Party USA** (CPUSA), and so many more unlisted or named groups, all in unison.

According to John Guandolo's 2024 investigative report titled, "Hamas in America" , **"Senior U.S. Hamas official Hatem Bazian was a founding member of AMP and is its current Chairman of the Board, and was the founder of SJP. Convicted Hamas terrorist Salah Sarsour is also on AMP's national board. The Executive Director of AMP, Osama Abuirshaid, served in the now-defunct Hamas organizations IAP (Islamic Association for Palestine) and UASR (United Association for Studies and Research)."**

I first had suspicions of some type of Islamist network in 2005, and started superficially digging on the topic of Islamist groups in 2014 and began formally investigating others in 2017. John Guandolo, a former FBI Special agent, Marine Corps Recon, Naval Academy graduate, Presidential threat advisor and current U.S. Patriot, author, investigator and educator, enlightened me through his program "Understanding the Threat" (UTT-defunct) as to the seriousness and gravity of the 'Islamist' threat and how it coincides with the CCP threat to an extent. ***There is no doubt that this is a concerted effort with some CCP influence and the influence of the Muslim Brotherhood to overthrow the United States, both physically and ideologically. -J.Robert*** They have managed to block and shut down several major airports and major roadways thus far (04/17/24). In 2024 they shut down sections of the 405 freeway. In 2023 they shut down a freeway in San Francisco, Ca. They also shutdown a highway in Chicago and Oakland Airport. In 2020 they planned and were successful in cutting off access to Creech Air Force Base which is annual, and in 2023 Travis Air Force Base in Fairfield, CA. Subject Matter Experts like LTC. Stephen Caughlin (Unconstrained Analytics), John Guandolo and Understanding the Threat (UTT)(defunct), Remnant Ministry, and Robert Spencer, Frank Gaffney (Center for Security Policy), David Horowitz, Freedom Center, Paul & David Gaubatz (Muslim Mafia), The Middle East Institute, Middle East Forum, Campus Watch, Ryan Mauro (Clarion Project), Trevor Loudon, Glenn Beck (Blaze Media), Pamella Geller and Bridgette Gabriel (Act) and several others who have been sounding the alarm for years, some for decades **trying to wake people up including the government,** however they continue to investigate, and track these groups in much more depth than myself. All of these people mentioned are definitely dedicated Patriotic Americans and heroes in my book.

"Most people following this insurgency closely have determined these protests will eventually escalate and intentionally will turn violent at some point, but only when that order to do so is given

and received, much like we have seen in the United Kingdom. Seems they (Iran) (MB) (China) ultimately control the Operational Environment, while perhaps most likely, the U.S. intelligence community supplys and controls the narrative (Color Revolution comes to mind) and the overthrow of the U.S. government from within". -J.Robert

Dr. Stephen Caughlin, a retired Air Force Lieutenant Colonel, is the Founder of Unconstrained Analytics (UA) a group, which specializes in analyzing threat groups and has a 360 degree evaluation of how these groups interrelate, their social behaviors and tactics. ***He refers to them by the group name NAIS or North American Insurgency.***

Organization

"The organizational structure of the NAIS is as unique as their tactics. At the tactical level, these revolutionary groups, most of them self-organizing, are loosely and temporarily united in a syndicate to wage unconventional warfare against the United States. They share a common goal – destruction of the government. At the strategic level, a clandestine organization exists with an underground infrastructure. The NAIS has formed a shadow government; it has a financial structure, political operations, media outreach, and international engagement. They have infiltrated most federal, state and local government institutions."

"The NAIS is employing an effective strategy with a tactical ground fight, unrestricted political warfare, and unmatched information operations. T heir development model functions similar to a rapid growth pyramid scheme, but instead of a product, they sell a radical ideology and the promise of fundamental governmental change. Their operations, recruitment and mobilization may not look like past guerilla armies, but they are proving, on a national level, to be every bit as effective as their revolutionary forbearers. The NAIS, despite the lack of an identifiable national hierarchy, has demonstrated the ability to mobilize personnel and assets from around the country for planned acts of violence. A New York Police Department (NYPD) analysis indicated that of those arrested in the New York City protests (June 2020), one in seven people were from outside on N.Y., including from the states of Massachusetts, Connecticut,

Pennsylvania, New Jersey, Iowa, Nevada, Maryland, Virginia, Texas, and Minnesota. The NYPD report stated "agitators" had planned violent interactions and vandalism as part of the BLM protests."

Ideology

*Interestingly, **there is no single ideology that members of the NAIS follow**. Many are adherents to traditional communist and Marxist ideology. Others, describing themselves as more enlightened, follow a modern blend of Marxist-Leninist-Maoist concepts. Some groups are motivated by an extreme belief in a single issue like anti-fascist, anti-racist, anarchist, anti-government, **pro choice** or **eco-war**. The syndicate also makes room for Islamic Jihadis. [12] Press Conference on May 31, 2020. In the mix are the Marxist Black Lives Matter Network, the New Black Panther Party for Self-Defense, the Nation of Islam, and other Black militias that are motivated to violence in the name of social justice. What are we to make of this? The common factor is that all come to the protest planning to use violence, and determined to fundamentally change, or overthrow the government. Strategy – Seduce, Scare, Subdue or Silence the Population NAIS largely follows the communist revolutionary play book of sedition, adapted for the modern era. This guide to revolutions was first develop by Marx, implemented by Lenin, and refined by Mao. Knowing that they do not have the strength or resources to directly confront the U.S. military, they must wage a people's war. The primary NAIS target, and the decisive element in this war is to exert influence over the population."*

'So many of these protesters are 'useful idiots', being methodically used by MB, AQ, CCP, Iran, Hamas, Hezbollah. Most of these activists have no idea who and what they are really, truly advocating for, especially the common liberal college or university student trying to save the world."J.Robert

'Seduction of the population, especially the youth, leads to sympathy, then to recruitment and mobilization. A study of past revolutions informs us that the number of revolutionaries

need not be large relative to the overall population. Only a small, committed, and active segment of the population is needed to force change or overthrow a government. This holds true for nearly all revolutions studied since Lenin took his train ride to Russia. For those they cannot seduce, which history tells us is normally the majority of the population, the resistance movement will marginalize. The NAIS will try to scare through acts of violence, intimidation, physical, and social media harassment. The next element is propaganda and the constant media narratives that support the insurgency and undermine the belief system of the majority. This mixture of fear and propaganda drives censorship, popularly known as "Cancel Culture." All this is planned to demoralize and subdue those citizens that would normally get involved by voting, counter-protesting, contacting congress, helping neighbors etc. And finally, the strategy is to silence the majority and force them to conform.

'Once the majority of the population feels socially isolated and begin to doubt the efficacy of their government - some of them scared to venture into the community, others subdued into inaction, and most afraid to express their opinion, the insurgency has achieved decisive victory. This then, is the NAIS strategy – Battle for the "hearts and minds" of just a few, coerce the majority into conformity, strengthen and sustain violent activity, marginalize the police, and then influence or overthrow the government.'-Unconstrained Analytics

UPDATED: *Media reported a good portion of the funding for all these, pro-Hamas, pro-Gaza university protests such as, Columbia, UT-A, UCLA,USC, UCSB and many more, where sizable numbers of students have been arrested around the United States (800+ arrest) some of which were escalated from 'protest' status to* ***'riot status'*** *over the weekend due to violence.*
In Florida a man named ***Atah Othman****, 39, was one of 10 protesters several charged with felonies for their part in the South Florida anti-Israel protest. He was carrying a loaded firearm on campus. Cult like behavior was observed in some video evidence I viewed on twitter. Seems like a* ***'anarcho-Islamo-commi' mix.*** *Reports mostly indicate they've been funded by the notorious George Soros and son Alex via the* ***Open Society Foundations*** *(OSF), The Rockefeller*

Foundation and Susan and Nick Pritzker. ***No surprise and at least this segment of the 'enemy of the true state' is clearly visible.***

Narayanappa Janardhan, a UAE, Abu Dhabi-based scholar with the Anwar Gargash Diplomatic Academy, stated in an interview **"The multipolar world we knew has now shifted. It is no longer conditioned by superpowers alone. It is just as likely to be conditioned by middle and smaller powers, who prefer multi-alignment." 'This geopolitical diversification process both insulates those countries from superpower conflict, but also offers mediation opportunities that the U.S. can leverage."**

Over the past two decades, democracy has been on the decline around the world, and of course Latin America is no exception to the rule. The region has suffered several setbacks; the rise of dictatorships in Nicaragua and Venezuela, an emboldened totalitarian regime in Cuba, and a hybrid authoritarian regime in Bolivia, and dangerous moves being made coupled with democracy erosion from Mexico all the way to Brazil.

Simultaneously,, the world has witnessed these two major world super-powers, the CCP and Russian dictatorships, completely devolve into more aggressive, and authoritarian type regimes. They have greatly expanded their influence across the globe, to include Latin America. Although these regimes may project their power in different ways, they've managed to form beneficial partnerships with the worst human rights abusers in Latin America, such as Nicolás Maduro in Venezuela and Daniel Ortega in Nicaragua. The U.S. currently has a bounty on Maduro for Narco-trafficking and corruption. Industry RUMINT says steps are currently being taken by the U.S using PSC and PMC's to assist the Venezuelan people. Likely by my former employer Erik Prince.

Venezuela much like Iran has heavy oil investment deals with China. In 2021, Nicaragua joined the Dominican Republic, El Salvador, and Panama in breaking official ties with Taiwan, and switching over its diplomatic recognition to the PRC.

Another kinetic threat we are faced with in the U.S. is another transnational criminal organization (TCO) in addition to the Mexican Cartels Sinaloa and CNGJ is Tren De Aragua. (TdA) This is a Venezuelan prison gang similar to MS-13 of El Salvador who has illegally immigrated to the U.S. and has set up shop in many different states such as Colorado, New York, and Texas. In theory, the PRC who is very close to the Maduro regime highly likely influenced Venezuela to attack the U.S. asymmetrically by weaponizing the South American & Mexican Cartels, and their pre-established migrant routes by sending their criminals to the U.S. TdA might even be paid to accomplish this tasking In CO they have commandeered apartment complexes, armed with weapons like firearms using strong arm tactics.They walk around with rifles slung and the local LE is too chickenshit to deal with them. They don't want to make political waves on the issue. It appears the Governor and Mayor may have welcomed these people to the city without 'the people's' consent. Although some totally naive voters may have envisioned a 'Sanctuary City' as a serene, jolly mix of only a few hundred, VETTED migrants, slowly assimilating to their new environment by learning American culture, values and traditions starting with English, that's not what's happening. Venezuela emptied several prisons and intentionally sent them here to cause mayhem & wreak havoc. Venezuela's crime rates are at all time lows, while ours is on the rise, at the expense of victims like Riley Gaines who was raped and brutally murdered. Without vetting completed, many who have entered the U.S. are convicted criminals in their home nations. There are massive cover-ups of these gangs' presence in all of these states, but the info is thankfully coming out via social media. I believe Ohio is also facing migrant issues on a whole different level including Haitians killing neighborhood cats for food and voo-doo sacrifice rituals. Also reports of them killing protected geese at local bird sanctuaries.

While all these activities are in motion, China is still playing the long game as usual. China's goals of expansion across the world with the Belt and Road initiative taking over old and or

building many new strategic shipping ports in Africa and in many other nations that not only boost international trade capabilities, but also allows for dual use of these ports in the sense that, they can be easily converted to operational naval facilities & bases offering strategic military advantages. The building of more interconnected rail lines, roads and land bridges will be equally advantageous. Belt and Road introduces a uniquely comprehensive and granular dataset of international development finance from China, which captures 13,427 projects that are worth $843 billion across 165 different countries in every world region over an 18-year period. This is what strategic competition looks like from one point of view.

The CCP are making bold power plays literally everywhere in the world, to not only dominate production, but also dominate and control trade routes and transportation of goods. One would say this is a display of a combined economic, and political warfare mixed with diplomacy. For instance there are over 200,000 Chinese immigrants in Panama that have essentially taken over all port work. They dominate control over the waterways. Panama city is the largest Chinese community in Central America. In order for a Chinese national to leave China it must first be sanctioned by the PRC government, therefore these migrants were placed in Panama City. Ecuador has modified its strict airway policy and permitted flights out of China to stop, after a brief stay they proceed to Venezuela and then on to Panama and the Darien Gap. All of this incredible, in depth investigative reporting, was done initially by **Michael Yon**, a seasoned War Correspondent & former SF member, a colleague of mine **Todd Bensman** former Texas DPS Counterterrorism Specialist, Investigative Journalist, **J.J Carrell**, U.S Border Patrol (ret), **Tom Holman**, U.S Border Chief (ret), LTC. **Pete "Doc" Chambers**, and **Brett Wienstien's** appearance on Tucker Carlson & Joe Rogan interviews and a small handful of Others. **Most of the aforementioned people were on the ground, on scene, in the Darien Gap, Panama, Mexico and other places where this mass, planned migration is originating.** All along their migration routes NGO's and other WEF, UN, US, China funded rest and recoup stations, water stations, signup for free phone, free debit card, hotel vouchers, destination maps and eventually medi-cal and EBT and even take government sanctioned flights to Mexico; some report direct flights to the U.S and subsequent bussing and distrobution of illegals nationwide.

Off topic, did you know that the CCP has had several Chinese police stations located inside the United States and other areas of the world? This permits them to locate, track, harass, stalk, arrest, kidnap and repatriate Chinese dissidents. That is pure madness to me!

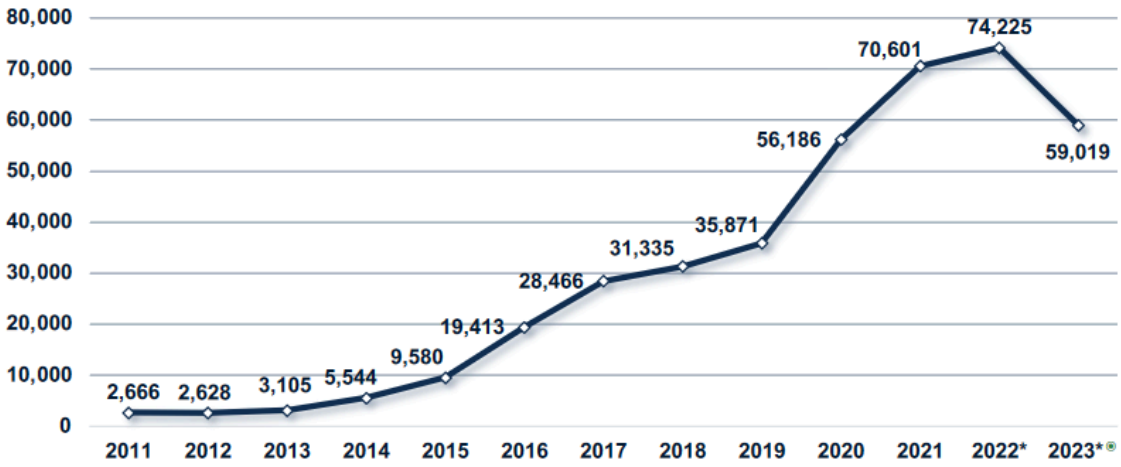
"Several members of Congress are considering closing their doors entirely to meetings with lobbying firms that represent companies linked to the Chinese military." Chinese linked military firms represent a huge portion of the lobbyists on the hill. This is a huge problem when the U.S ends up paying for our enemy.

CHEMICAL WARFARE AKA '*THE FENTANYL CRISIS*'

By my specific reporting on fentanyl I am not attempting to marginalize the extremely large group of others who have lost a loved one to addiction or a drug overdose from another chemical compound. In fact, I will also show a DEA chart depicting the losses of Americans to Methamphetamine which the cartels and the PRC are also complicit in manufacture and trafficking. I'm simply focusing on fentanyl because it's a current epidemic, it's CCP centric with regard to precursor manufacture and it's being intentionally used as a ***weapon of mass destruction*** *(WMD).*

'Following a months-long investigation, Chairman Mike Gallagher (R-WI) and Ranking Member Raja Krishnamoorthi (D-IL) of the House Select Committee on the Strategic Competition Between the United States and the Chinese Communist Party revealed their findings

Figure 7: Synthetic Opioid (Other than Methadone) Poisoning Deaths, 2011-2023*



*provisional data | ◉CDC continues to receive 2023 data

Source: National Center for Health Statistics, Centers for Disease Control and Prevention

The Chinese Communist Party's role in the deadly fentanyl epidemic that has killed hundreds of thousands of Americans.

The fentanyl crisis is one of the most horrific disasters that America has ever faced. On average, fentanyl kills over 200 Americans daily, the equivalent of a packed Boeing 737 crashing every single day. ***Fentanyl is the leading cause of death for Americans aged 18-45 and a leading cause in the historic drop in American life expectancy. It has led to millions more suffering from addiction, and the destruction of countless families and communities. Beyond the United***

States, fentanyl and other mass-produced synthetic narcotics from the People's Republic of China (PRC) are devastating nations around the world. It is truly a global crisis.

Source: 2024 DEA REPORT

The PRC, under the leadership of the Chinese Communist Party (CCP), is the ultimate geographic source of the fentanyl crisis. *Companies in China produce nearly all illicit fentanyl precursors, the key ingredients that drive the global illicit fentanyl trade. The House Select Committee on the Strategic Competition between the United States and the Chinese Communist Party (Select Committee) launched an investigation to better understand the role of the CCP in the fentanyl crisis.*

United States v. Jianxing Chen, Xizhi Li, et al.

In May 2023, Belize-based money launderer Jianxing Chen (aka John Chen) pled guilty to U.S. Department of Justice money laundering charges. From Belize, Chen organized networks of cash couriers and money processors who collected millions of dollars of cash drug proceeds in Chicago, Houston, Los Angeles, New York, and Atlanta. Over many years, Chen and one of his co-defendants, Xizhi Li (aka Juan Lee, John Lee) laundered this cash into U.S. accounts with beneficiaries in mainland China and coordinated the transfer of money from Mexico-based money processors or China-based clients into the hands of Mexico-based drug traffickers for very low fees.

This investigation involved delving deep into public PRC websites, analyzing PRC government documents, acquiring over 37,000 unique data points of PRC companies selling narcotics online through web scraping and data analytics, undercover communications with PRC drug trafficking companies, and consultations with experts in the public and private sectors, among other steps.

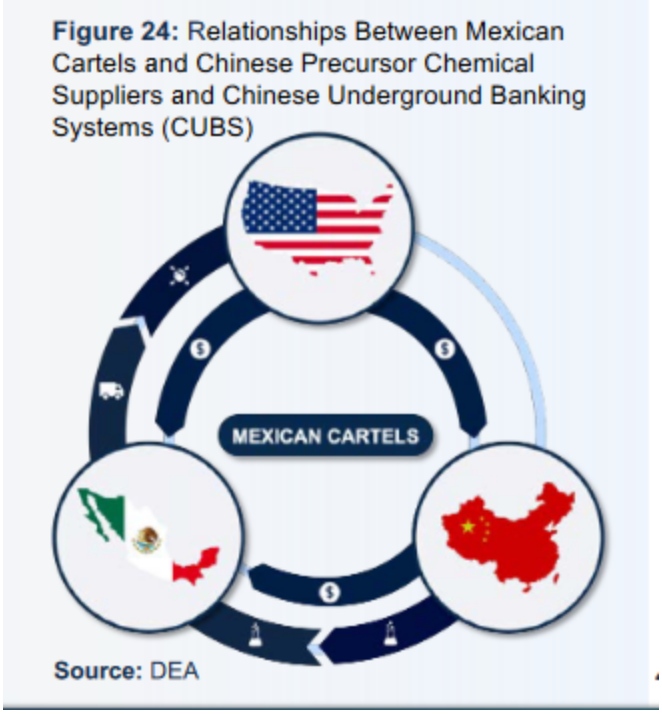


Figure 24: Relationships Between Mexican Cartels and Chinese Precursor Chemical Suppliers and Chinese Underground Banking Systems (CUBS)

Source: DEA

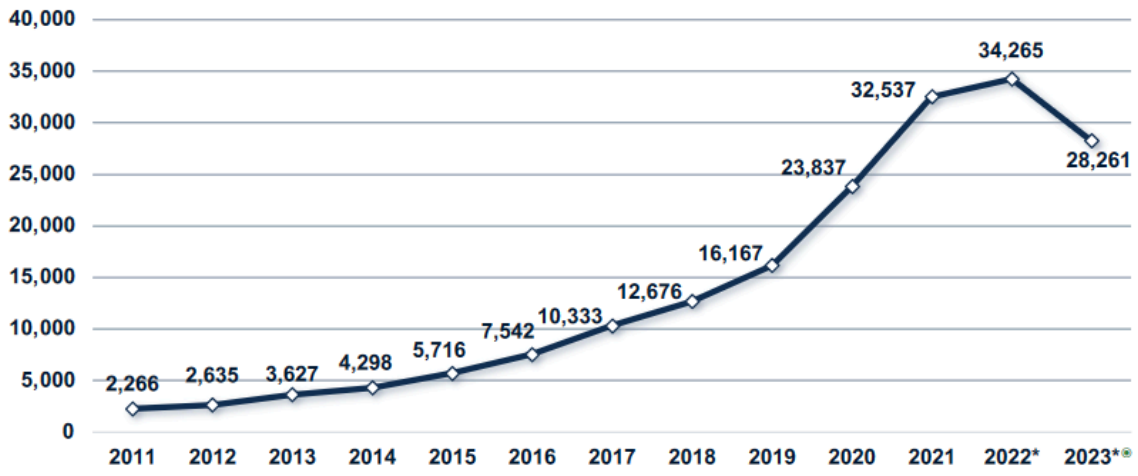
The Select Committee's investigation has established that the PRC government, under the control of the CCP:

- ***Directly subsidizes the manufacturing and export of illicit fentanyl materials and other synthetic narcotics through tax rebates. Many of these substances are illegal under the PRC's own laws and have no known legal use worldwide. Like its export tax rebates for legitimate goods, the CCP's subsidies of illegal drugs incentivizes international synthetic drug sales from the PRC. The CCP never disclosed this program.***
- ***Gave monetary grants and awards to companies openly trafficking illicit fentanyl materials and other synthetic narcotics. There are even examples of some of these companies enjoying site visits from provincial PRC government officials who complimented them for their impact on the provincial economy.***
- ***Holds ownership interest in several PRC companies tied to drug trafficking. This includes a PRC government prison connected to human rights abuses owning a drug trafficking chemical company and a publicly traded PRC company hosting thousands of instances of open drug trafficking on its sites.***

- ***Fails to prosecute fentanyl and precursor manufacturers. Rather than investigating drug traffickers, PRC security services have not cooperated with U.S. law enforcement, and have even notified targets of U.S. investigations when they received requests for assistance.***
- ***Allows the open sale of fentanyl precursors and other illicit materials on the extensively monitored and controlled PRC internet. A review of just seven e-commerce sites found over 31,000 instances of PRC companies selling illicit chemicals with obvious ties to drug trafficking. Undercover communications with PRC drug trafficking companies (whose identities were provided to U.S. law enforcement) revealed an eagerness to engage in clearly illicit drug sales with no fear of reprisal.***
- ***Censors content about domestic drug sales, but leaves export-focused narcotics content untouched. The PRC has censorship triggers for domestic drug sales (e.g., "fentanyl + cash on delivery"), but no such triggers exist to monitor or prevent the export of illicit narcotics out of the PRC.***
- ***Strategically and economically benefits from the fentanyl crisis. The fentanyl crisis has helped CCP-tied Chinese organized criminal groups become the world's premier money launderers, enriched the PRC's chemical industry, and has had a devastating impact on Americans.***

'While the PRC government publicly acknowledged in November 2023 that the trafficking of fentanyl precursors and other illicit narcotics materials in the manner described above is illegal under Chinese law, the Select Committee found thousands of PRC companies openly selling these illicit materials on the Chinese internet—the most heavily surveilled country-wide network in the world. The CCP runs the most advanced techno-totalitarian state in human history that "leave[s] criminals with nowhere to hide" and has the means to stop illicit fentanyl materials manufacturers, yet it has failed to pursue flagrant violations of its own laws.'

Figure 15: Psychostimulant-involved (Mostly Methamphetamine) Poisoning Deaths 2011-2022



*provisional data | ◉CDC continues to receive 2023 data

Source: National Center for Health Statistics, Centers for Disease Control and Prevention

A. The Fentanyl Crisis Benefits PRC Criminal Enterprises, Helping Solidify Support for the CCP

According to a recent Senate Select Committee Report, "The global illicit fentanyl trade has enriched the PRC itself, empowered its organized crime assets through lucrative money laundering, and offer PRC elites a means to move a certain amount of their capital abroad, thus diminishing the risk of their dissent. It allows the PRC to further its strategic interests by, per PRC Major General Qiao, "caus[ing] disasters in other countries and making huge Profits."

Through subsidies, grants, and other incentives, the PRC harm Americans while enriching PRC companies. It also, through the drug trade, gains dominance over the world of illicit finance.While the opacity of the PRC's financial system makes it impossible to estimate, even earning a fraction of the Mexican cartels' estimated $6 to $21 billion a year in profits would certainly qualify as "mak[ing] huge profits" under Qiao's definition.

As author Ben Westhoff has explained, "the PRC government encouraged the export of fentanyl, fentanyl precursors, and other synthetic narcotics as they are

"seen as a vital part of its economy." To foster these exports, it offered subsidies and tax breaks for chemical companies that produce and export those drugs that may run into the millions of dollars in potential revenue. Each individual company can secure hundreds of thousands if not millions of dollars in potential revenue. These companies also enjoy a symbiotic relationship with the PRC provincial authorities who consider it an imperative to achieve the provincial GDP goals set by Beijing. As Westhoff noted in a 2019 interview, beyond any national policy, "you might [therefore] have a provincial official who wants to let these companies keep doing what they're doing because it brings in more revenue for the area."

On the most lethal note, China has killed, as of last year (2023), over **Three-hundred twenty-seven thousand (327,237 k)** of my fellow countrymen since 2018, utilizing '***chemical warfare***' AKA 'Fentanyl' and its many analogs, against the Western population. Similar, but lesser numbers were reported the years prior. More than three-fourths of the heroin-related deaths in the United States also involve fentanyl.

"Although China is a signatory to the CWC, scientists at a Chinese military research institute have expressed interest in military applications of pharmaceutical-based agents, such as fentanyl. Despite its participation in the BWC, China continues to develop its biotechnology infrastructure and pursue scientific cooperation with countries of concern. Studies conducted at Chinese military medical institutions discuss identifying, testing, and characterizing diverse families of potent toxins with dual-use applications.

There's now the addition of another compound mixed with some of the Fentanyl called Xylazine (street name "tranq"), which causes additional negative effects to include, flesh eating disease, zombie effect, overdose, or death **(see streets of San Francisco)**. To exacerbate the situation to its fullest, fentanyl has now been found present in common marijuana batches.

Yes, they are putting this poison inside common marijuana. The same marijuana that many future American adolescent kids have direct access to, and have a propensity to experiment with in middle school and up. All it takes is one time, and that child is gone forever. I'm rather passionate on the topic due to, two of my very good friends Anthony Michael Munoz and Louie

Matthew De La Cerda (*RIP) who were both poisoned to death, just under two years ago, in California. They were only in their thirties and had a good future ahead of them. I can speak with authority when I say, they had no idea China and a cartel was out to kill them. Had they known, they would be among the first, to step up, and do battle. Tony, a father of two young girls, was slated to enter the Coast Guard Reserve and was employed as a County Park Ranger; Louie was a soft spoken and eager Security Officer, teen-youth counselor and youth basketball league coach, both had a positive outlook and promising futures. Unrestricted warfare in my humble opinion is unethical on its face value, and Chemical Warfare, whether its an anti-riot agent all the way to phosgene has either forever lasting or lethal immediate effects. I can't imagine the number of people all around the U.S. alone, directly affected and indirectly affected by the loss, of all those 300,000+ people, and the amount of pain, grief, and hardship all have endured collectively, at the hands of the People's Republic of China commanded by the Chinese Communist party (CCP), in direct conjunction with, the Mexican Sinaloa & Jalisco cartels, both (TCOs). Our losses should be publicly viewed as 'Casualties of War' and the government should be liable for not keeping its citizenry safe from harm.

It's been reported by several outlets that we are being poisoned by many different things that are putting a damper on military recruitment. Common household tap water has large amounts of fluoride which is lowering the IQ of children by at least two points. PFA's are now being found in high amounts within bottled water. If these problems are occurring within the U.S. Imagine what China is doing to the food they produce for us, or all the prescription medications. Did you know that the PRC manufactures seventy-five (75%) of all U.S antibiotic pharmaceuticals?

China also owns three food processing facilities for ⅓ of all U.S beef and pork. Over 80 percent — of U.S. farmland owned by Chinese corporations or investors is owned by Smithfield Foods. Located in Smithfield, Virginia, Smithfield was purchased by the Hong Kong-based WH Group for $4.7 billion in 2013. At the time, it was dubbed "the biggest Chinese takeover" of a U.S. corporation, one of the U.S.'s biggest producers of industrial meat. The WH Group is also the

majority shareholder in Henan Shuanghui Investment & Development Co. — China's top meat producer.

Unfortunately that's only one aspect. I should also discuss here, according to daily caller investigative journalist George Ventura, China has hundreds, maybe thousands of illegal marijuana 'grows' inside the U.S. mainly in California, but also other states. Perhaps this is where many of the Chinese nationals that came through the S/W border illegally are headed. Palmdale California is infested with these properties, many of these Chinese Grow properties are near or surround U.S. military installations, providing possible cover for a clandestine SIGNALS & MEASUREMENTS listening post for the CCP? Or perhaps strategic barrier penetration launch points, for a concerted frontal or flanking assault and penetration of base perimeters. Much like Hamas performed on Israel Oct 7th .

Photo Credit: Screenshot YouTube-Dr.Phil Show & Rudy Guiiani

That particular scenario was asymmetric. They attacked via foot soldiers, via four wheeler truck, Motorcycles, all terrain vehicles (ATVs), unmanned aerial vehicle (UAV), motorized gliders with

explosives, with reports they also came in by zodiac assault watercraft. Most of these ranch properties have ethnic Chinese as armed personnel, but more often cartel members.

These illegal grows located on U.S. based, Chinese owned and operated ranches need someone to efficiently harvest and trim all the marijuana plants after they have been properly cut and hung in dry rooms or houses, which are later packaged and sold.

Ventura also reported in NORCAL, Siskiyou County there are properties with armed Chinese and Mexican workers, some of which are tasked with tapping into and stealing state, local and private water to supply the many grows. They tap into any neighboring properties with makeshift siphoning equipment. Ventura reported that some of the areas are so dangerous that Police, Fire and EMS won't respond including the Amazon delivery person. These grows are easily detectable by targeting with commercial overhead Intelligence Space & Reconnaissance (ISR) assets available to the government to identify the illegal grows. Likely, not all of the recent illegals will go there, surely some are future clandestine spies, some will go to college and then proceed to deceive, manipulate, penetrate, and ultimately infiltrate more U.S companies for Intellectual Property (IP) theft or industrial espionage.

Some of them theoretically and according to several U.S leaders could assemble, train, and launch a mass, internal, coordinated, armed military-style assault (s) like what was done in Mumbai India, combined with Oct 7th, and the recent Russia attack; and maybe 9/11. I say this not to be an alarmist. I say it because according to them (AQ) what they are planning is bigger than 9/11. J.Robert

According to Ventura, within California the Sinaloa and New Jalisco Generations Cartels solely operate the Opioid and Fentanyl trades in California, while the Chinese Triads and 14k mafia provide oversight and control of the illegal marijuana market. This was likely part of their deal as many Chinese PRC chemists, businessmen, and lab specialists have been spotted and located in Mexico, solely on a mission to establish new clandestine labs for the cartels. These PRC operatives and gangsters act in an advisory capacity to the cartel on proper manufacturing

processes and lab procedures. Some of these fentanyl production spots are not even housed within a laboratory or structure. They are located in the woods, in remote areas, whereas they simply use barrels and wood handled poles/paddles to stir and mix the chemicals outdoors, often still without proper ventilation. Many of these would-be chemists are enlisted from poor neighborhoods and paid extremely low wages in comparison to the danger represented, many end up dead due to toxic and lethal chemical exposure due to not wearing essential personal protective equipment (PPE). **I've had more than once source state that the precursor chemicals the PRC creates and sends to Mexico are only sold to the cartels for U.S $600.00 per barrel and the byproduct of the cartel cooking the chemicals can yield $500k to 1 Million dollar street value for one batch. The profit is astounding and too easy for the cartel to pass up, therefore the loss of human life means nothing to them. Pure business transaction.**

The Mexican government no longer has operational control of Mexico, it is now in the hands of the Cartels and its newly elected female leader who is reported to be very Socialist, perhaps even Marxist with ties to China and will likely embrace each other. Having a country this recklessly out of control as a neighbor in bed with the PRC, with their cartel operations and violence now spilling over in all 50 U.S. states, is not a good thing. Congressman Kelsey Graham recently spewed rhetoric with regards to sending in U.S. forces to Mexico. I tend to agree with him to an extent. The next President should consider it. Our SOF forces are uniquely qualified to target cartel operations if provided the right rules of engagement (ROE) that sit well diplomatically and in concert with Mexican special forces..

The other angle on fentanyl is, it's the leading cause of death for American males, ages 18-49 years old. One would think it'd be drunk driving, driving without a seatbelt or maybe the infamous semi-auto AR-15 rifle? And yes, 18-45 years old is the prime age for military recruitment and enlistment in the United States Armed Services. Even if China didn't accurately plan, predict and anticipate this desired effect, the effect on our military recruitment numbers is evident and reflected in the current military personnel recruitment shortages among other things.

Over 300,000 Americans have been targeted and murdered. They are both (China/Cartel) directly responsible for all these deaths and the deaths in years prior. This underscores China's use of asymmetric chemical warfare tactics.

WHILE ON THE TOPIC OF "SIGINT" & "MASNT" !

CUBA, situated 100 miles off the coast of Florida, has provided space in its territory for the CCP to set up improved radar systems and listening outposts. Coincidentally, Florida is home to many military installations and bases for all services. In particular, its home to CENTCOM located MacDill AFB, Tampa, FL, SOUTHCOM located Miami (Doral), Florida, which has two Joint Task Force components in addition to a Special Operations command at Homestead Air Reserve Base near Miami, Florida all of which contain strategic and tactical operations centers. There are 14 other military installations or bases affected or likely to be targeted from the PRC listening apparatus in Cuba. SOCOM headquarters is at MacDill Air Force Base, Fla. Its components include the U.S. Army Special Operations Command at Fort Bragg, N.C.; the Air Force Special Operations Command, Hurlburt Field, Fla; the Naval Special Warfare Command, Coronado, Calif., and the Joint Special Operations Command at Fort Bragg. The John F. Kennedy Special Warfare Center and School, the U.S. Air Force Special Operations School, and the Naval Special Warfare Center are also assigned to the command.

Special operations are those conducted against strategic and tactical targets in pursuit of national military, political, economic or psychological objectives, by personnel specially trained, equipped, and organized to do so.

"China has continued to strengthen its presence in Cuba by placing new radar and SIGINT stations near US territories. These new stations are only 100 miles from the east coast having a clear direct line of sight with major military installations such as Macdill. According to the latest data, new stations have appeared in four districts: **Bejucal, Wajay, Calabazar** and **El Salao.**

The stations apparently have a wide range of capabilities and can easily monitor US military activity in the region and our country."

If the Russian SIGINT base in Nicaragua raised concerns, Cuba might be as well worth a look."

According to a Reuters article,'The Biden administration on Friday added six Chinese entities connected to Beijing's suspected surveillance balloon program to an export blacklist. The new restrictions come after the White House said it would consider broader efforts to "expose and address" China's larger surveillance activities that threaten U.S. national security and allies. The Commerce Department said the five companies and one research institute were supporting "China's military modernization efforts, specifically the People's Liberation Army's (PLA) aerospace programs including airships and balloons."

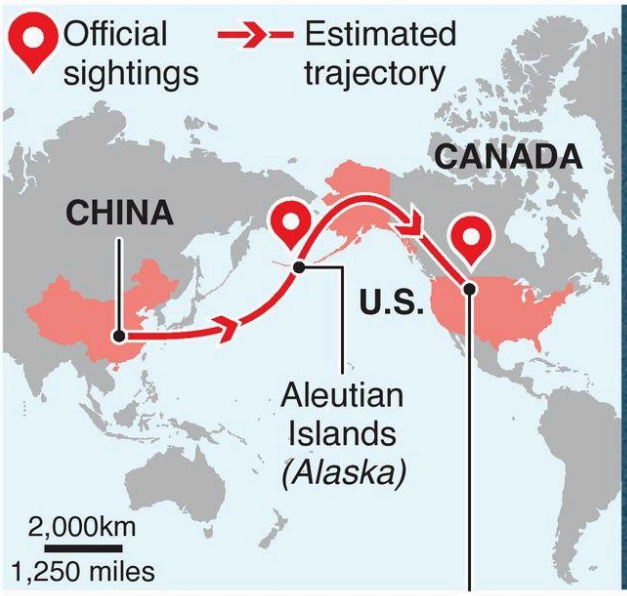
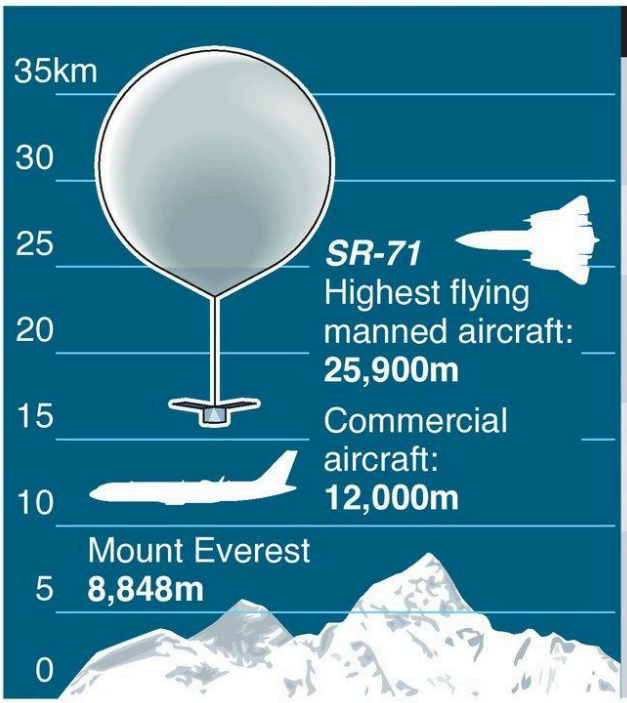
U.S. tracking Chinese spy balloon

The U.S. is tracking a suspected Chinese surveillance balloon that has been spotted flying over sensitive sites



■ **Feb 1, Billings, Montana:** Balloon spotted over city, near one of three nuclear missile silo fields in country at ***Malmstrom Air Force Base***

■ **Tracking:** F-22 jets mobilised, but Pentagon advises against shooting balloon for fear debris could pose safety threat



High-altitude surveillance balloon

■ Typically operates at 24-37km (80,000-120,000ft), well above commercial air traffic

■ Spying equipment may include camera, radar. May be solar powered

■ Can be guided to target area by changing altitudes to catch different wind currents

■ Widely used by U.S. and Soviet Union during Cold War as low-cost intelligence gathering method

■ **Several spy balloons have recently flown over U.S., but this balloon appears to be lingering longer**

Sources: U.S. Department of Defense, Reuters Picture: Chase Doak via Newscom © GRAPHIC NEWS

The spectacle of the Chinese balloon drifting over the United States last week caused political outrage in Washington and brought into sharp focus the challenge that China posed to the United States and its allies. It prompted Secretary of State Antony Blinken to cancel a trip to Beijing that both countries had hoped would patch up frayed relations. Being added to the entity list makes it hard for targeted companies to obtain U.S. tech exports. Both U.S. President Joe Biden and his predecessor Donald Trump have used the list to punish Chinese companies viewed as a threat to national security and keep Beijing from advancing
Militarily.

Source Photo Credit:https://www.thisismoney.co.uk/galleries/article-11722053/P

"Today's action demonstrates our concerted efforts to identify and disrupt the PRC's use of surveillance balloons, which have violated the airspace of the United States and more than forty countries," said Assistant Secretary of Commerce for Export Enforcement Matthew Axelrod.

The Commerce Department said the six entities supported the modernization of China's PLA and its aerospace programs including airships and balloons. "The PLA is utilizing High Altitude Balloons for

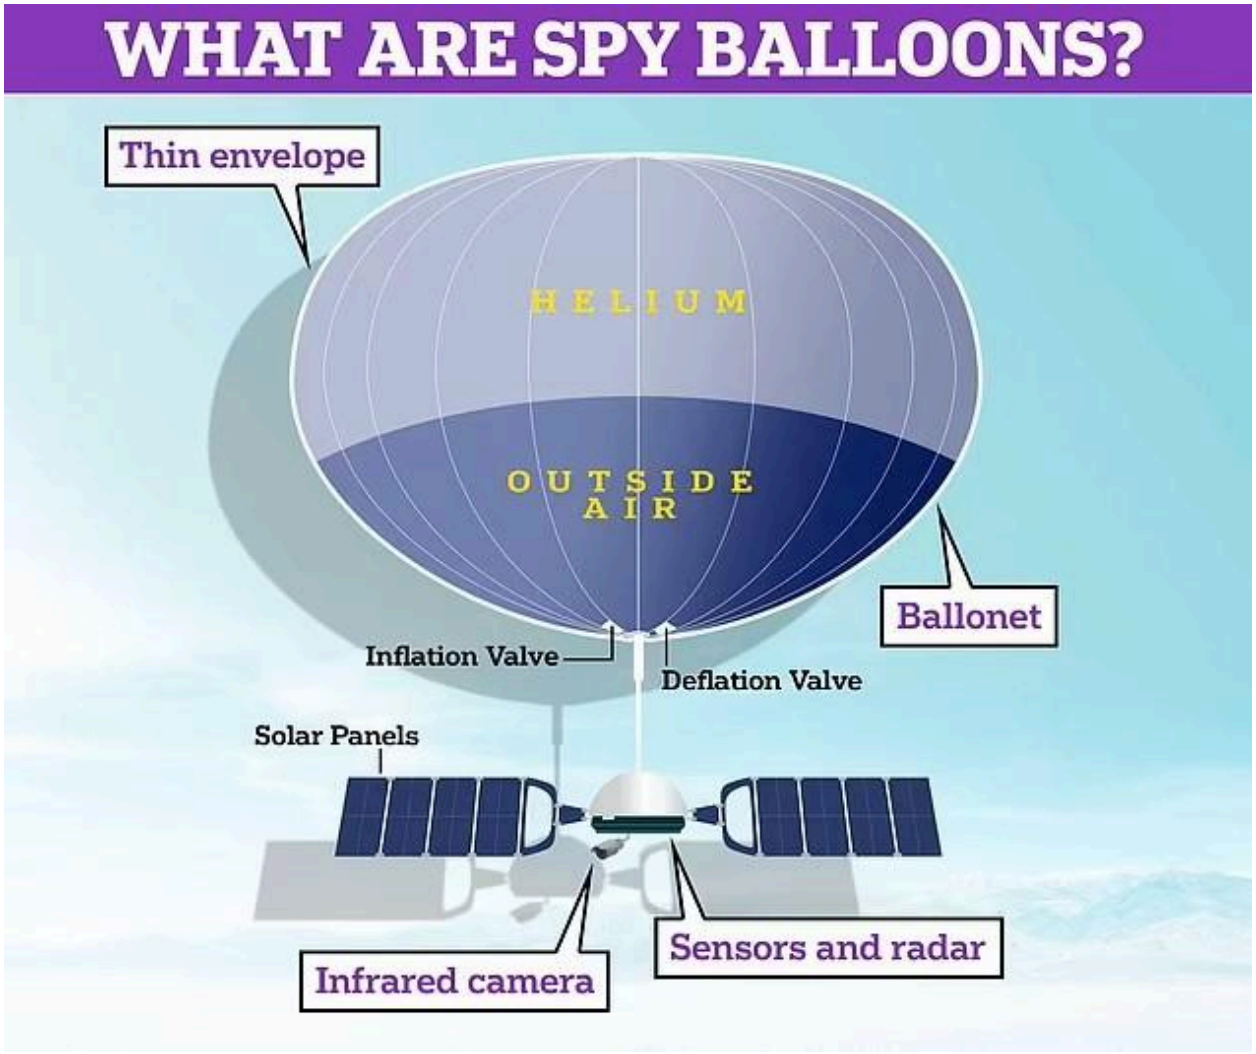
intelligence and reconnaissance activities," said the listing posted for the Federal Register, the official U.S. daily journal.

ENTITY LIST

Two of the entities are **Beijing Nanjiang Aerospace Technology** and **China Electronics Technology Group Corporation** 48th Research Institute. The Biden administration also added **Dongguan Lingkong Remote Sensing Technology**, **Eagles Men Aviation Science and Technology Group**, **Guangzhou Tian-Hai-Xiang Aviation Technology** and **Shanxi Eagles Men Aviation Science and Technology Group**. An employee at Guangzhou Tian-Hai-Xiang Aviation said she was not aware of the sanctions, and declined to comment further. The company has **close ties with the Chinese military**, and makes aviation products for civilian and military use, according to its website.

The Chinese embassy in Washington and China Electronics Technology Group Corporation 48th Research Institute did not immediately respond to requests for comment. **The government-owned 48th Research Institute produces sensors for civil and military use, according to its website.** Beijing Nanjiang, Dongguan Lingkong, Eagles Men Aviation Science and Technology Group, and Shanxi Eagles Men Aviation Science and Technology Group could not be reached.

Beijing Nanjiang is a unit of Shanghai-listed developer Deluxe Family (600503.SS), according to an exchange filing. The company **partnered with Beihang University** in developing China's first military-civilian near-space airship named **"Dream"**, according to the official People's Daily. Dongguan Lingkong was indirectly invested in by the Institute of Beihang University in Dongguan, which develops unmanned airships, according to public registration information. Both Eagles Men Aviation and Shanxi Eagles Men Aviation were invested in by a private equity fund promoting military-civil integration.
Washington has said it was confident the manufacturer of the Chinese balloon, which the U.S. military shot down last weekend off the U.S. east coast, has a "direct relationship" with the PLA.



The U.S. Air Force downed the balloon off South Carolina on Saturday, a week after it entered U.S. airspace. China's foreign ministry has said it was a weather balloon that had blown off course and accused the United States of overreacting.

NORTHCOM intentionally let this thing float around for a week before shooting it down in my opinion, unless of course they just didn't see it. Very quite odd if you ask me, was this Joe's idea of being subservient to the PRC ? There are other reports indicating China has done this many

times before even during the Trump presidency. And in those cases they failed to detect the Chinese asset invading U.S Sovereign airspace until after the fact. This balloon also violated the airspace of 40 other countries. Very bold move by the CCP and a sure way to test the Biden administration. The damage done in these instances is still unrealized and unknown. SIGINT could have been collected from any number of military bases the unit may have hovered over. This includes COMINT, SIGINT, MASINT, nuclear communications, and cell phone comms.

DIPLOMACY

Diplomatically speaking, I've been hearing for years that the Department of State is faltering in its diplomatic missions. Secretary of State Anthony Blinken has not succeeded at diplomatic efforts to stop the flow of chemical precursors to the west; perhaps his next upcoming visit to the PRC will yield different results. The CCP is beyond complicit, and continues blaming Chinese organized crime which is a joke. Nothing gets past the CCP without their knowledge and permission, not even organized crime. To think these fentanyl precursor chemicals could leave China without the government knowing or receiving a cut again is laughable. Some experts argue the CCP is intentionally targeting the U.S with rampant drug addiction and death as a 'payback' for the 'Great Opium Wars' of the 1800's. In that historic scenario the British mostly proceeded to get half of China addicted to opium causing the main worker base to be full of addicts, thus putting a huge damper on their working economy for years. They still blame the U.S. for that embarrassing time in history for China.

Since I mentioned Secretary Blinken. Did you know that he has familial relations & ties with the notorious Anti-America, super-left, Hungarian born George Soros? I'm only assuming, but I would not doubt if he was "placed" in the Secretary's position at State, with the sole purpose of damaging, not furthering, U.S diplomatic relations around the globe. RUMINT says he was given the post by Biden for his explicit role in hushing the "Hunter Laptop from hell"and helping discredit it as "Russian Disinformation" along with former Director CIA Morell. Just last night I heard that his mission has failed in the AFRICOM region, specifically Niger. According to Congressman Matt Gaetz we have over 1000 active duty and reserve component servicemen and

women that are trapped in Africa on their small base that includes contractor support personnel and members of Army Special Operations Forces (ASOF). The soldiers are long overdue for resupply of water, food and medical supplies.

There has been a complete failure in negotiations in Niger. Something to do with the regular 'coups attempts' that occur wherever we are. Gaetz's report is very clear. He's indicated that members of DOS are sabotaging operations from a 60 degree perspective. Including lying about the number of deployed personnel, overflight approvals and much more. Sounds like a severe problem. According to Gaetz's report, Senior Defense Official/Defense Attaché Colonel Nelson-Richter US Embassy Niger, under Ambassador Kathleen FitzGibbon and Senior Defense Official/Defense Attaché (SDO/DATT) are covering up the failure of their U.S. diplomatic efforts in Niger.

Air Force Major General Kenneth Ekman, AFRICOM J5, Director of Strategy of The US Embassy is dismissing or suppressing Office of Special Investigations (OSI) & Special Operation Command Africa (SOCAF) intelligence and information that supports the aforementioned CNSP demands and is actively working to contain and/or refute U.S. intelligence assessments. Intelligence service members received "emails where [SDO/DATT] would ask us to reword info in reports which would downplay what happened. All of the major stuff was phone calls," seemingly so that there would be no record.

UPDATE:09/13/24 Secretary Blinken being held in contempt of congress.

Taking a look at the CCP'S model for diplomacy. *'The Foreign Affairs Commission holds ultimate decision-making authority in China's foreign policy process. Moreover, the Commission's office, overseen by a state councilor, possesses the mandate to execute the Commission's decisions. The director of the Commission's office – currently diplomat Wang Yi – is widely regarded as one of the top leader's most trusted foreign policy advisers. Bureaucrats across other agencies recognize that the director speaks on behalf of the top leader, thus*

enabling the director to leverage this influence to overcome fragmentation and ensure compliance among other actors involved in foreign policy. Consequently, top leaders can utilize the structure of the Foreign Affairs Commission to align disparate bureaucratic entities toward a unified diplomatic objective.

According to a retired Chinese diplomat, "comprehensive diplomacy" encompasses several dimensions. The Ministry of Foreign Affairs (MOFA) primarily manages state-to-state relationships with foreign countries. Similar to foreign ministries worldwide, MOFA's responsibilities include staffing and supporting missions abroad, managing foreign diplomats within China, formulating and implementing foreign policies, and engaging directly in negotiations.

In addition to these typical diplomatic functions, MOFA also oversees local-level international relationships, such as sister-city partnerships, through its "professional guidance relationship" with local foreign affairs offices. For localities, the main objectives of local diplomacy are to create business opportunities and attract foreign investments. MOFA's guidance ensures that these local diplomatic activities align with national diplomatic objectives and do not stray from them.'

The PRC has been aggressive in its efforts to bolster itself as a world leader in global diplomacy. They have been leading efforts in BRICS nations such as Brazil, Russia, India, China, South Africa, Iran, Egypt, Ethiopia, and the United Arab Emirates. They have also invited Argentina to join, but thankfully they declined with new leadership at the helm. Many other South American countries are being targeted These BRICS nations combined, equate to three and a half billion (3.5b) people or approximately forty-five (45%) percent of the people on earth. All of the BRICS members' combined economies equate to twenty-eight and a half trillion dollars ($28tn) or twenty-eight percent (28%) of the global economic market. China uses all kinds of shady statecraft to accomplish deals where they always become the victor by ending up being owed tons of money or in lieu, the CCP ends up owning a large piece of the respective country's land rights or critical infrastructure. They also use strong arm tactics that are not so diplomatic.

As recent as November 2023, U.S. Military Leader General Charles Flynn (Army), Sounded the alarm on China's Assertive Pacific Military Expansion. 'Amid rising concerns, General Flynn, overseeing a substantial US Army presence in the Pacific, highlights China's rapid military advancement and assertive conduct, emphasizing the critical need for preparedness and vigilance. With China's significant transformation into a formidable global military force, marked by remarkable progress under President Xi Jinping, the growing tensions in the Pacific demand a strategic response to counter China's assertive actions and territorial claims.'

In

BIOLOGICAL WARFARE (CHINA VIRUS)

Throughout history, belligerents have almost always sought rapid, decisive annihilation to bring a conflict to a successful end. This has primarily been done through surprise and overwhelming application of force, which presents the opponent with a fait accompli and saps their will to fight. However, quick annihilation in the initial phases of a war is unlikely in a LSCO conflict with a near-peer adversary operating on their periphery. Such a scenario would lead to protracted conflict that could stress every facet of national power.'

"China is expanding and modernizing its nuclear arsenal. By 2033, China will probably have more than 1,000 nuclear warheads, the capacity for persistent ballistic missile submarine patrols, dedicated nuclear bombers, and hundreds of hardened ICBM facilities.'

'Both Russia and China probably view WMD use as an asymmetric advantage to help overcome their perceived weaknesses while having an outsized impact on U.S. operations. Future LSCO conflicts are likely to involve chemical weapons on the battlefield, and the threat of biological and nuclear weapons use will probably rise.'

"The primary U.S. adversaries all possess or are developing capabilities that increase the potential for conflict. China, our pacing threat, seeks to become a highly modern military capable of defeating the United States regionally and eventually globally in a joint, multidomain war. The Chinese People's Liberation Army (PLA) modernization is not designed for just technological overmatch. Instead, it is

designed to challenge the U.S. Army and Joint Force by dominating in materiel, soldiers and leaders, and approach to warfare—three areas that have underpinned U.S. military might since 1991. Russia, our acute threat, continues its campaign of aggression against Ukraine while simultaneously presenting continuing risks in key areas. These include threats to the Homeland; long-range cruise missiles; cyber, information, and space; nuclear, chemical, and biological weapons; and extensive gray zone campaigns."

Let's not forget the "Wuhan Virus" aka SARS-Covid-19 another type of warfare called '***Biological Warfare***' and the shut-down of nearly the whole world's economies. Of course China was at the forefront of the 'China Virus' by locking down everyone, quarantining people like crazy, videos of mass public beatings for non compliance, and actually welding shut people in their domicle's so they could not even get out when a fire erupted and ravaged the building. We have seen the evidence and know Fauci and others at National Institute of Health (NIH), Dr. Peter Dazac and others had direct, inside knowledge of, funded, authorized "Gain of Function" research, and then proceeded to cover it all up after the virus leaked or did it leak? Maybe they released it on purpose? Either way, they knew before it was at a 'pandemic' level and intentionally failed to notify and inform the WHO or the world for that matter, intentionally obfuscating the truth!

Our own government often fails at providing the truth to the public. Several aimed to benefit financially from concealing the fact that the virus was made in a lab and leaked. Thanks to Senator Rand Paul's investigations, doc leaks and doctors like **Dr. Robert Malone**, **Dr Peter Mcculugh** and **Dr. Steven Hatfill** we know much more than we did, Senator Paul aims to find out more and put someone in jail. The (PRC) were not a good role model to follow during the pandemic, but my governor in Commiefornia, governor Gavin Newsom, much like Canada's dictator Justin Trudeau, and Facecrook CEO Mark Zuckerberg literally admire Xi Xi Jinping and think he is god almighty. They truly do admire him, mostly for the power and control he wields as a dictator, but also as a source of future capital markets . An update to this communism admirer section is Minnesota governor Tim Walz who Presidential candidate Kamala Harris has selected as possible future Vice President of the U.S. Gov Walz connections to the PRC are

undeniable and should be investigated further immediately. The anti-communist saying, "Better off Dead than RED" immediately comes to my mind. Biological warfare is just another big tool in the warfare bucket. I suspect it will be used again against us perhaps something new like Monkeypox (M-Pox) or the new E. E. Encephalitis that started mutating in AFRICOM and has already spread to the U.S? Ironically the same continent where the company Meta-Biota recently moved to, from Ukraine. By the way, Hunter Biden is invested in that company through Rosemont Capital. Interestingly they just happened to have the proto-type vaxx available to administer to the African nationals infected with m-Pox. Ethics and morals come to mind here. Currently a Massachusetts town is on daily lockdowns and evening curfews due to EEE. So, am I failing to mention the other types of warfare China has waged against the United States?

IS ANYTHING TRUE? Deciphering the Non-Sense

How about **'information warfare'** they wage it against us everyday. Unfortunately, the Obama administration took steps to legalize the U.S governments authorities to spread false PROPAGANDA within the U.S.A and among its citizenry. So things are bad enough. Then we have the Communist Party and thousands of people whose sole job it is, to show up for work, login to their computer work station, fire up the net, and navigate right into our internet hemisphere, unlike theirs, which is heavily fortified by the "Great FireWall" and 1) put out false stories, 2) narratives that favor China + CCP, 3) run bot farms to manipulate online discussions, 4) spread mis-information on different social media platforms, 5) install dis-information, and 5) influence public opinion in volume, finally (6 Penetrate anything that's hackable and install Malware or other viruses to be activated at a strategic time of importance such as VOLT Typhoon. The FBI has thousands of open and active investigations just on nefarious PRC activity. I think they open something like five (5-10) new cases per day. That includes Chinese transnational criminal organizations (TCOs), criminal, and foreign intelligence and influence operations make up most of those cases.

CYBERWAR

Then we have the '**cyberwarfare'** aspect. Apparently, they have so many people in the service of the PRC that the ratio of CCP Hackers to FBI Cyber Warfare agents is **50:1.** Fifty of their people to one of ours. Why isn't this being addressed? Where's the damn recruiting flier? Instead of our lazy American youth playing video games all day, or protesting we could recruit them into service, train them, and pay them to engage and conduct battle against a real life foe! I don't know what I'm getting at here, mainly just trying to clear my head and keep track of all the angles the CCP is playing against us. The CCP's hacking campaign has been relentless especially while coupled with Iranian and Russian attacks. All states have been engaging in cyberwarfare. VOLTTyphoon is a very critical situation and CISA and the FBI director have both given multiple warnings to congress that many critical infrastructures systems have already been penetrated, viruses installed and ready for a command to activate. Many of these systems operate on the older SCADA systems that support things like industrial control systems, commercial and non-commercial potable water systems, the electric grid, natural gas, transportation systems such as railway, airports, subway and bus systems. The list is endless. Basically, if it has any type of computer system, it could be vulnerable to attack by CCP, Iran, Russia or any threat actor like Hezbollah, to include domestic threat groups. The closer you are to the target computer (network access) the better and that should be alarming with all the Chinese illegals that are currently within our borders, many of which are (no doubt) CCP operatives. The CCP is responsible for 10's of thousands of past cyber attacks.

WHAT ELSE CAN THEY STEAL ?

'The PLA recognizes the importance of the human dimension in military operations and is professionalizing its officer and NCO corps accordingly. For officers, it is developing and reinforcing leadership traits, including political loyalty to the Chinese Communist Party, strategic awareness, skill at military affairs, adherence to military culture, adaptivity, and intangibles. To improve its NCOs, the PLA established two different types of NCOs. The first deals with traditional NCO leadership tasks, while the second are technical experts with engineering, information technology, and data science experience.'

They have literally infiltrated every aspect of our country's infrastructure and are even copying our Armed Forces Non-Commisioned Officers (NCO Corps). If I were to list every angle they are playing I'd be typing for hours, but more like days. This brings me to the course I just finished titled "Irregular Warfare 101" through the Irregular Warfare Center at Defense Security Cooperation University. It broke down a lot of stuff for me when it comes to warfare and "Low intensity Conflict" as the U.S views it. I call myself a "half assed wanna be war strategy student" of modern warfare. This was supposed to be my career, in my early life (a soldier like Rambo) and I was actually and thankfully indoctrinated in high school, at age 16, in some U.S Army doctrine and operations through the Army JROTC program. I even earned the 'Recondo tab', finished the cadet 'Raider Challenge', and got a cheesy certificate+ribbon from the Army Special Forces Association, but I couldn't enlist, only due to medical disqualification, not by choice. I managed to serve my country in other fulfilling ways. However, I have much enjoyed my share of military training and education early and later in life and had the opportunity to participate in training/maneuvers and to read things like FM-31-20 Special Operations Doctrine and among other things,the highly relevant Chinese paper titled, "**UNRESTRICTED WARFARE**" written by, two former CCP military generals in the late 1990's. I believe this is what current doctrine China is using against the United States. In my personal opinion, World War III (Three) officially started a while ago, exactly when ? At least a year ago, maybe more.

For the aforementioned very reason, this is why the CCP would want to copy our long history of having a phenomenal NCO Corps, which is by far, one of the best, most historical, and required central aspects of our Armed Forces. It is rooted in tradition and is the centerpiece of all of our services' strength and might. Building young, strong, indoctrinated NCO's who adhere to chain-of-command (CoC) having been qualified, educated, trained into multi-disciplined warfighters, that have experienced line level leadership, has been at the heart of most of our battle wins for centuries. Our NCO leadership programs, no matter which service, have also, equally created and produced quick logical/critical thinking, well balanced, level headed, highly productive and efficient members of American society year after year.

It's more often than not referred to as the "Great Power Competition" or GPC. When we take into account the several large Chinese spy aircraft that were outfitted for signals collection efforts, that were outfitted with self/solarpowered/ propulsion with abilities to transmit and send collected data to the PRC. Why did that take so long to neutralize? Probably good ole' Joe again giving them (CCP) a free pass, (again) literally this time. Who knows how long those aircraft have been floating above us while performing mass signals, data collection efforts as it was permitted to traverse over sensitive military installations and more. Who really knows for sure what they were exactly targeting. Could it have been cell phone transmissions? Strategic nuclear launch data? It seems NORTHCOM dropped the ball more than once here or maybe that is not the case.

ESPIONAGE; INFLUENCE; AND SUBVERSION OPERATIONS

How about all the military, industrial, economic espionage cases that have been prosecuted the last 10-20 years and the ones that haven't even been unearthed yet?

Chinese intelligence operations directed towards the United States should never ever be overlooked as simply a small conglomerate of just a few intelligence agencies. Although it doesn't have as many government intelligence agencies as the U.S., what it's lacking it makes up for by the deputization of the whole government and people. The Chinese utilize a whole of society & government approach with respect to the targeting of the United States economically, infrastructurally, societally. That seems to be a common theme, using an entire apparatus to achieve one goal, such as with CCP diplomacy.

It is extremely important to also fully comprehend that the Chinese Communist Party is not only on a mission to acquire sensitive classified information , material, and protected intellectual property. It is also very active in making every attempt possible to create ideal conditions that undermine the United States of America; Sow internal dissent amongst the population, and further cripple what the CCP views as its primary adversarial entity from within. This means, among many lines of effort such as, targeting & engagements, providing funding to groups that

seek to divide Americans along any possible lines, but most especially racial and class lines, always promoting “class warfare’.

‘The CCP is also looking to co-opt and recruit influential Americans, including politicians, military, Hollywood and business leaders and especially academics. This includes ELITE CAPTURE, which is thoroughly explained in Peter Swietzer’s books, “Blood Money” and “Red Handed”. CCP seeks to steer American foreign and domestic policy and to persuade the United States to adopt policies favorable to Beijing and not to the American people. They have been very successful in accomplishing this thus far.’

Source/Credit:The below model (2 images) was provided by Yuri Bezminof a famous KGB defector, Tomas Schulman and belongs to the Russians; however China likely follows a similar model. Perhaps even they have assisted each other in accomplishing this mission.

	↓	
	CRISIS (2 – 6 MONTHS)	
	↓	
	NORMALIZATION	

This chart shows the four stages of Soviet ideological subversion: demoralization, destabilization, crisis and normalization. The methods used by the subverter in the different areas of life produce their desired results in a country that does not resist the subversion process.

This means they leverage CCP relationships to the fullest, tapping on whatever resource is necessary to obtain intelligence mission information objectives, this often includes leveraging familial ties within the CCP, or external overseas resources, including dissidents living in the United States. This model is exercised throughout the whole government.

The CCP intelligence apparatus is composed of two elements 1) Civilian 2) Military. The Ministry of State Security (MSS) is the civilian side and operates much like the United States C.I.A. They have clandestine officers and support stationed abroad and stateside. They operate within the United States to recruit Americans to spy for Beijing.

On the military side, within the People's Liberation Army (PLA), several intelligence organizations fall under the General Staff Department; the General Political Department for intelligence and covert influence operations; the PLA Navy, Air Force, and Second Artillery headquarters; and the Technical Reconnaissance Bureaus for the military regions they are assigned. Much of this intelligence apparatus is land based in China, however Military defense attachés and clandestine intelligence collectors do also operate within the U.S.

FBI Director Wray recently advised that 2500 of the current Counterintelligence investigations opened are directly linked to the PRC and their operations.

I was personally affected by the 2015 Office of Personnel Management (OPM) data breach. The PRC hackers were able to collect SF-86/Eqip data for thousands of American personnel that had been vetted and issued security clearances (PCLS) from the Confidential Level all the way to Top Secret (TS). The people holding these cleared positions within government and who were affected by the breach could be the janitor for a cleared organization all the way to executive military leadership or even an undercover CIA clandestine operative. DoD, DoE, Department of State and many others. This makes this breach particularly sensitive in nature due to the following types of incidents already occurring and preceding the hack. According to the internet,"*Between 2010 and 2012, China was able to arrest or kill between 18 and 20 CIA assets*

within China.[43] *A joint CIA/FBI counterintelligence operation, codenamed "Honey Bear", was unable to definitively determine the source of the compromises, though theories include the existence of a mole, cyber-espionage, compromise of Hillary Clinton's illicit classified email server as noted by the intelligence community inspector general,*[44] *or poor tradecraft.*[43] *Mark Kelton, then the deputy director of the National Clandestine Service for Counterintelligence, was initially skeptical that a mole was to blame."*

More recently as of 09/10/2024, **"Ex-Hochul and Cuomo Aide and Husband Worked as Foreign Agents for China, Splurged Millions on Mansion, Hawaii Condo, Ferrari: Feds"** *(NY Post)*

Linda Sun and her husband, **Chris Hu**, have been indicted in New York for receiving and laundering millions of dollars in illicit booty from the Chinese Communist Party (CCP) in exchange for Sun's manipulation of NY Governors **Andrew Cuomo** and **Kathy Hochul** to ice out Taiwan.

Chris Hu and Linda Sun

This isn't the first time Democratic politicians have been duped by agents of the CCP.

Please recall…

"**Details Surface About Sen. Feinstein and the Chinese Spy Who Worked for Her"** *(CBS News, August 2018)*

Dianne Feinstein's Chinese staffer drove her around to official engagements day in and day out, and acted as Feinstein's liaison to the Bay Area's Asian-American Community for nearly 20 years.

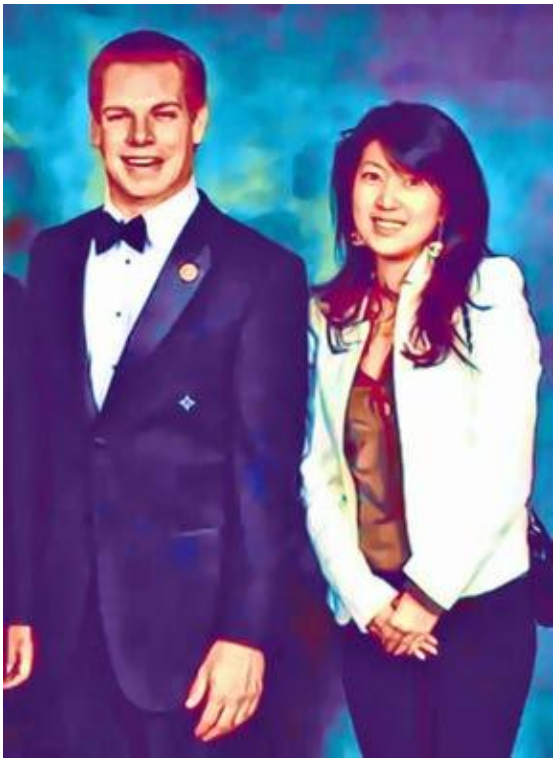
Nor was it the second time…

“Exclusive: Suspected Chinese Spy Targeted California Politicians” *(Axios, December 2020)*

California Rep. **Eric Swalwell** got snookered by Chinese agent **Christina Fang**, a.k.a. **Fang Fang**.

Christina got her fangs into Swalwell while he was a Dublin (California) City Council Member and helped him raise money for his election to Congress.

Clearly, the CCP was grooming Swalwell for higher office.



Eric Swalwell and Fang Fang (a honeypot?) make a lovely couple

Axios: *Private but unclassified information about government officials — such as their habits, preferences, schedules, social networks, and even rumors about them — is a form of political intelligence. Collecting such information is a key part of what foreign intelligence agencies do.*

OTHER IRREGULAR WAR HYPOTHETICALS

My personal, unproven theories. Hypothetically, taking the U.S. Boeing Company for instance. I think it's not that far-fetched, that the CCP has paid operatives to infiltrate the Boeing Company assembly factory, with a goal of completing substandard quality work on the aircraft assembly line, so as to taint and ruin the future reputation of the Boeing product line as a whole. This will cause a great distrust for future passengers flying via their aircraft and by the average weekly flier. Meanwhile, back at camp the CCP is launching new aircraft product lines and breaking further into the industry. They've been targeting Boeing engine technology for a long while. What if Boeing has to complete a recall on a bunch of aircraft? Enact a complete company wide stand down until quality assurance problems are corrected and resolved ?

Other, likely sabotage operations such as the dozens and dozens likely hundreds of railway accidents and incidents, some catastrophic like East Palestine, Ohio having real environmental and community impacts. Although the Anarchist communist are likely to blame, China & Russia have still likely had a hand in them.

Fire as a Weapon (FAAW) , I once took a course on this topic, a bonafide recognized tool of warfare, has long been touted by groups like Anarchist, Al Qaeda, ISIS and others. They have posted online tutorials on how to make cheap improvised incendiary devices (fail-proof methods) with the goal of setting large or numerous fires in the wildlands. Doing so will and has caused havoc such as evacuation, breathing difficulty from ash and smoke (poor air quality), and force their enemy (us) to utilize and exhaust both physical, material and financial resources on said fires, thus draining us economically over time. California wildland fires are a prime example, just like clockwork every year. Sure, some of the blame is Governor Newsoms' failure to manage the dead forest debris, which requires teams to cut back, collect, packout dead foliage,

which in essence is fire-fuel. Sometimes they conduct “controlled burns”. He refuses to implement required forestry management protocol to save money. The fires cost much more such as firefighter lives (health), homes, property and more lives. Just recently the San Bernardino, Ca Sheriff's department arrested a person strongly suspected of intentionally setting the “Line Fire”. Technology was used to capture his license plate while near the suspected initial point of origin of the fire, which has ravaged the area and caused mass evacuations. I’ll be interested in this suspect's motives and affiliations and am also curious if he/she is responsible for other past acts of arson or terror. Its entirely possible he's an unwitting operative being paid by unknown masterminds.

On top of this, we have had several hundred structure fires at prominent manufacturing plants, dairy farms, chicken and cattle farms and major meat processing plants across the country for at least two (3) years most brushed off as ‘accidental’. Many of those are likely covert acts of sabotage and terrorism by foreign operatives or converted homegrown violent extremists (HVE) following **Anarco-communist** doctrine otherwise labeled as domestic terrorism or domestic violent extremism, another made up term like ‘assault weapon’. Many of these are done at the direction of the Globalist who share China’s ambitions. Some of them were busted conducting these operations in Chile, Greece and Spain, a safe haven for Gobalist Anarchists.

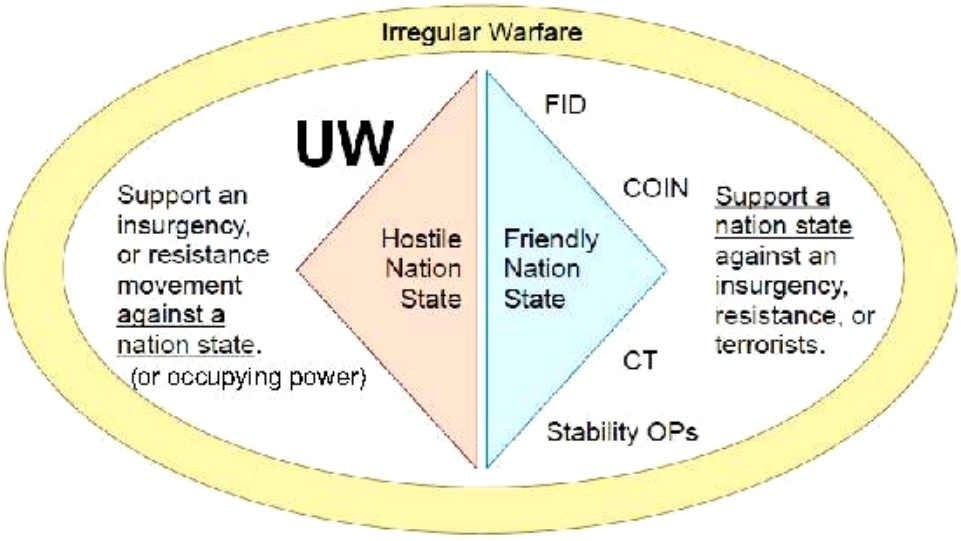
Concurrently, the United States has its own provisions for this operating under three titles in the United States Code (U.S.C). – Title 10, Title 22, and especially

Title 50 – are foundational to US National Security and foreign relations.
Together, these titles govern US Armed Forces, the Department of State, public diplomacy efforts, and our national defense. Assassination protocol, influence ops, direct action, simple sabotage, coup d’état, training guerrilla forces, foreign internal defense (FID), drone strikes, cyberwarfare and more (use imagination).

Having worked in this space for some time it is astounding that most citizens have no idea that classified grayzone operations are ongoing throughout the country and world, have been for some time. Our special operations assets and clandestine operatives play an overwhelming critical role in the U.S's ability to compete with our adversaries in different domains. J.Robert

GRAYZONE =IRREGULAR WAR = SPECIAL OPERATIONS

Mission sets-



What is SOFs Value Proposition for LSCO? *In LSCO, the unique value of SOF comes from their ability to shape the deep fight through a combination of their core activities. As illustrated in the historical vignette below, SOF employed their abilities to conduct UW and employ the Iraqi Peshmerga to tie down eleven enemy divisions. Historical Vignette Task Force Viking, otherwise known as Combined Joint Special Operations Task Force-North (CJSOTF-N), dramatically advanced the success of Operation Iraqi Freedom (OIF) by employing UW forces against a conventional enemy comprised of one armor, two mechanized, and eight infantry divisions. By doing so, they disrupted the enemy and reduced his ability to reinforce southern Iraq. Having defeated the enemy to its front, CJSOTF-N then switched its focus from offensive combat to establishing stability throughout the region. The SOJTF demonstrates the value of special*

operations in LSCO to the Joint Task Force (JTF) commander and staff. This begins with imparting an understanding of special operations core activities. These are

Special Operations Core Activities

- **Unconventional Warfare (UW)**
- **Foreign Internal Defense (FID)**
- **Direct Action (DA)**
- **Civil Affairs Operations (CAO)**
- **Special Reconnaissance (SR)**
- **Security Force Assistance (SFA)**
- **Counterterrorism (CT)**
- **Hostage Rescue and Recovery (HRR)**
- **Counterinsurgency (COIN)**
- **Foreign Humanitarian Assistance (FHA)**
- **Countering Weapons of Mass Destruction (CWMD)**
- **Military Information Support Operations (MISO)**

DA, SR, CWMD, CT, UW, FID, SFA, HRR, COIN, FHA, PE, MISO and CAO

COUNTERINSURGENCY

Special Forces Soldiers are often deployed to prevent terrorist and insurgent incidents abroad. They respond to terrorist activities and train other nations' militaries in the basics of fighting insurgents.

UNCONVENTIONAL WARFARE

The cornerstone of Special Forces operations, unconventional warfare is activities conducted to enable a resistance movement or insurgency to coerce, disrupt, or overthrow a government or occupying power by operating through or with an underground, auxiliary, and guerrilla force in a denied area.

DIRECT ACTION

Direct Action missions are short duration strikes used to seize, capture, recover or destroy enemy material, or recover personnel.

FOREIGN INTERNAL DEFENSE

Foreign Internal Defense is the act of training and equipping foreign allied military forces to defend against insurgency, subversion, terrorism and other security threats.

SPECIAL RECONNAISSANCE

Surveillance conducted in hostile, denied, or diplomatically or politically sensitive environments is known as Special Reconnaissance. During this mission, Soldiers collect or verify information of strategic significance, and employ capabilities not normally used by conventional forces.

SECURITY FORCE ASSISTANCE & Security Cooperation

During Security Force Assistance missions, Special Forces Soldiers are called upon to train and aid the defense capabilities of friendly and developing nations.

INFORMATION OPERATIONS (IO)

IO refers to actions taken to affect adversary information and information systems while defending one's own information and information systems. The following activities support the IO mission: DA, SR, PSYOP, CA.

How Does SOF Help to Shape the Deep Fight?

SOF provides the only ground maneuver forces in the deep areas.[20] The following table provides an outline of how SOF enables the Joint Force Commander (JFC) and subordinate commanders to:

Capability	Unit/Activity
See deep with both U.S. and indigenous capabilities employing:	• Special Forces Operational Detachment Alpha (ODAs)/Civil Affairs (CA)/Psychological Operations (PSYOP) • Indigenous forces • Rangers • Marine Corps Special Operations Command (MARSOC) • SEAL Platoons
Provide terminal guidance to joint fires in the deep areas employing:	• ODAs • Rangers • MARSOC • SEAL Platoons
Employ indigenous assets in order to:	• Conduct raids and ambushes. • Assist in cyber and information operations by providing a physical point of presence. • Conduct sabotage and subversion.
Seize or protect Critical Targets / Assets / Individuals with:	• Rangers • ODAs • Indigenous forces • MARSOC • SEAL Platoons
Consolidate gains rapidly within newly won ground by employing:	• PSYOP • Civil Affairs • Indigenous forces

Table 1. SOF contributions to the deep fight, arrayed by capability and corresponding unit.

SOURCE; USASOC Capability Developments Integration Directorate Handbook: Special Operations Joint Task Force.

Other covert and clandestine operations such as complete regime changes are made entirely possible, for which the U.S has been involved with over seventy (70) times (since 1950's). There's always an 'Op' going on by someone somewhere. For instance actions like the demolition of the Crimean Kersch bridge or the Nord Stream pipeline that exploded (Ukraine/Zelenky just claimed (08/2024) or the massive cargo ship that plowed into Baltimore's Francis Scott Key Bridge,100 percent a cyber hit. The recent explosion in China's main port. Take note,"Our nation's 'port system' is the main point of entry for trade, it employs 31 million people, and generates over $5.4 trillion for the U.S. economy." Knowing this, our maritime waterways and supporting infrastructure are high stakes critical infrastructure.

USSOCOM has recently (2020) had to evaluate their current status since the GWOT has ended. Their mission focus has been re-focused on the GPC. It has already been tasked to realign the

SOF mission sets and determine how SOF skill sets can be best utilized and applied in future mission planning, capacity building and engagements.

Since our special operations capabilities are so vast, when I'm discussing U.S SOF ground forces capabilities, I like to stick to discussing SOF from a U.S Army Special Forces standpoint. I do have a bias and preference for ARSOF units. This started as a kid watching RAMBO and manifested in me directly working and playing closely with, and in support of, ARSOF units later in life in a professional capacity. Simply stated, traditional ARSOF capabilities are utilized the most by our executive branch of government. Although the over-glamorized Navy SEALS are just as Elite and command my respect equally, they are the most mentioned and depicted in Hollywood mostly for their abilities to infiltrate enemy territory via rubber raft or use SEAL delivery vehicle (SDV), when it comes to the nitty gritty, ARSOF brings its own unique capabilities and skill-sets that other SOF branches have yet to master. Starting with their mandatory foreign language skills and ability to rapidly adapt to cultural diversity, which translates directly to ARSOF'S 'Indigenous Approach' or ability to stand up foreign fighters or whole armies and make them an asset either to the U.S or to the actors own state, usually in a resistance capacity.

As In the end we have a Joint Force that has been tested for years now. This concept merges the different SOF forces and specialties to bring a diverse set of skills, assets and power, building comprehensive packages for each mission and the variables they present. However, much like all the other branches SOF AFSOC, NSW, MARSOC, Rangers, the Army as a whole, but specifically Army special operations forces (ARSOF) has had the last four (4) years, since the end of GWOT to refine their individual protocols to be employed in the GPC.

No doubt SOF has already been used in the Great Power Competition (GPC). I feel SOF is one of our best and most prized assets in support of diplomacy and just short of war. However, while defining their specific purpose in doctrine is likely close to completion, their exact role within the strategic

plan is yet to be shared. USSOCOM and the many special operations teams it commands have several other collateral duties not listed, making them even a more highly unique asset that we have in the tool box, often referred to as the "Third Option". I firmly believe in the near future, SOF will often be the first or second option to choose from in upcoming conflicts (SOLIC) on the distant horizon .

TROJAN HORSE: EMBEDDED WITHIN PURCHASED PRC EQUIPMENT-AFFECTING TRANSPORTATION & SUPPLY CHAIN INFRASTRUCTURE

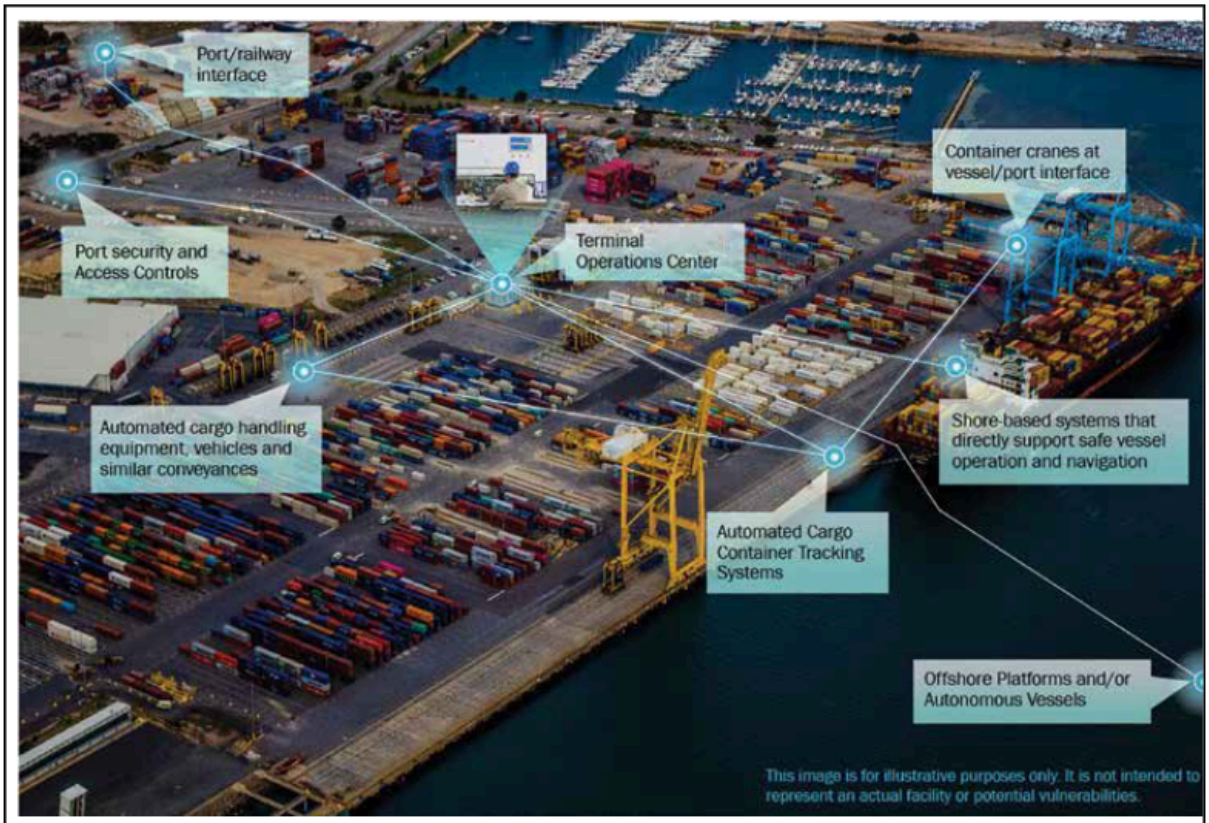
Recently, I noted an article about a bunch of large high tech cranes the U.S purchased with all 'made in China' by ZPMC, using automation software pre-programmed to communicate with CCP networks.

A recent government report stated the following.

'U.S. ports are essential components of the global supply chain, facilitating the movement of goods and passengers across domestic and international borders. The continued growth of port and network systems is critical for a robust U.S. economic and strategic system. As technology and automation become increasingly integrated into port operations, interconnectivity is emerging as a key driver of efficiency and economic growth. However, the growing interconnectivity of ports increases the attack surface and the number of vulnerabilities within port networks leverageable by malicious cyber actors. To maintain economic security, the U.S. must adopt a comprehensive risk management approach and secure network ports based on cooperation and close partnership between government and Industry.'

'Due to the interconnectivity of the U.S. maritime transportation system, cyber incidents targeting one facility or terminal operator may negatively impact local port operations and potentially create supply chain disruptions, compromise cargo and passenger safety, and disrupt critical infrastructure

operations.'



Port/railway interface
Container cranes at vessel/port interface
Port security and Access Controls
Terminal Operations Center
Automated cargo handling equipment, vehicles and similar conveyances
Shore-based systems that directly support safe vessel operation and navigation
Automated Cargo Container Tracking Systems
Offshore Platforms and/or Autonomous Vessels
This image is for illustrative purposes only. It is not intended to represent an actual facility or potential vulnerabilities.

Figure 1. Interconnected infrastructure at ports for cyber security considerations.[2]

A SUMMARY OF KEY FINDINGS

Based on our research and analysis we identified the following key findings:

• Physical-cyber infrastructure, such as port operational equipment, may provide attackers opportunities to conduct cyberattacks that physically disrupt port operations if vulnerabilities are found.

• Application program interfaces (APIs), if not designed with security in mind, can facilitate access and lateral movement through a port and third-party vendor networks to implement cyberattacks.

• Supply chain risk management (SCRM) based approach can help ports stay secure as they increasingly outsource services to remain competitive.

• Communication and trust between government entities and port facilities are vital for the rapid identification, containment, mitigation, and recovery of cyberattacks on port facilities.

Port Components at Risk
1 Facility Access
The degradation or disruption of systems used to identify and direct cargo, truck drivers, and facility personnel can cause significant congestion or the closure of the terminal until systems restoration is complete.
2 Terminal Headquarters – Data
Malicious actors may access information systems within the terminal in order to access sensitive client and cargo information. Malicious actors may also attempt to use this information to steal cargo or smuggle illicit cargo through the terminal.
3 Terminal Headquarters – Ransomware
The manipulation or destruction of data, most commonly seen in ransomware attacks, can disrupt operations within a facility until systems and data can be restored from reliable, isolated backups. Previous attacks have resulted in facilities being partially or completely offline for days, resulting in significant business losses.
4 Operational Technology (OT) Systems
OT Systems – systems, devices, and communications links used to control physical processes at ports, including cargo handling equipment and pumps – are being increasingly incorporated into maritime facilities. The compromise of OT systems could cause changes to cargo movements, interrupt port operations, and cause physical damage to equipment and safety risks for personnel.
5 Positioning, Navigation, and Timing (PNT)
Position, Navigation, and Timing is pervasive throughout the Maritime subsector, and plays an essential role in many maritime functions such as vessel navigation and port logistics. Loss of PNT services would disrupt vessel movements in the port and complex logistics systems at port facilities. Loss of PNT could also lead to collisions and allisions, resulting in potential damage to fixed infrastructure, pollution, release of hazardous material, fires, loss of life, vessel sinking, and blocking of a navigable channel.
6 Vessel
Compromised systems aboard a vessel or inside a port facility could lead to the compromise of additional waterside or landside systems. Interconnectivity between berthed vessels and maritime facilities through the sharing of Wi-Fi, network connections, USB storage devices, etc. can lead to system compromises that otherwise may not have occurred.

Like, seriously ! Nobody conducted a thorough in depth review or a forensic analysis of the software for malware, backdoors, trojan or other anomalies before the purchase and acquisition of these crane units ? Biden said he would pay to fix the situation, more like we'll pay (U.S taxpayer) to correct their egregious and poor sourced supply chain. Glad they caught this one; these cranes are located in most major ports on both the U.S. East & West coast. The 33 page investigative report is HERE. **I can't even fathom what other thousands of electronic devices are communicating back to Beijing from within the U.S.**

DIGITAL/PHYSICAL ELECTIONS MANIPULATION & INTERFERENCE

The article below underscores the operational tactics and gall the CCP will utilize in an effort to change election outcomes in favor of the PRC and subvert American democracy as a whole.

- Oct 8, 2022

‘🚨 Election Software CEO Arrested For Storing Voter Data on Chinese Servers

Eugene Yu, the CEO of the U.S. election software company Konnech, was arrested in connection to the storage of election data on Chinese servers.

October 7, 2022

by KanekoaTheGreat on SubStack

Konnech CEO Eugene Yu's connection to China's National People's Congress & Chinese telecom giants

I meticulously documented everything I found about Eugene Yu for the last six weeks — and now I'm ready to teach New York Times reporters and FBI agents what I found. It's super simple!

Eugene Yu, the CEO of the U.S. election software company Konnech, was arrested yesterday in connection to the storage of election data on Chinese servers.

He was arrested in Michigan by investigators from the Los Angeles County District Attorney's office with assistance from the Meridian Township Police Department. Investigators allegedly found U.S. poll workers' information stored on servers in the People's Republic of China.

The day before Yu's arrest, the New York Times' Stuart Thompson published an article entitled, "How a Tiny Elections Company Became a Conspiracy Theory Target."

Thompson, who covers "misinformation and disinformation," wrote about how "far-right election deniers" concocted an elaborate "conspiracy theory" that Konnech "had secret ties to the Chinese Communist Party and had given the Chinese government backdoor access to personal data."

Near the end of the article, he dedicated a few sentences to Eugene Yu's Chinese company, "Jinhua Yulian Network Technology, a subsidiary out of China, where programmers developed and tested software."

“Konnech closed the subsidiary in 2021 and no longer has employees in China,” he concluded.

Contrary to the New York Times reporter’s lack of curiosity, I found it extremely concerning that Eugene Yu, also known as Jianwei Yu (于建伟), established a Chinese R&D subsidiary in Zhejiang, China, on November 29, 2005. So I spent the last six weeks meticulously documenting everything that I could find about Jinhua Yulian Network Technology (金华宇联网络科技有限公司) in a series of articles.

Click photo to read article.

While doing that research, another independent journalist discovered an archived version of Eugene Yu’s Chinese company’s website, "yu-lian.cn", where Yu praised the vision of the former Chinese President, who he called “Comrade Jiang Zemin.”

On that same website, Yu boasted about his success with “Election Management Solutions Detroit” and “U.S. Overseas Voters,” as he wrote in Chinese:

> “In line with the principle of "**political tasks first and economic benefits of enterprises second**," our company has perfected and formed the whole set of election management theory and software tools in line with China's national conditions.” “We hope to ride on the spring breeze of political reform and provide you with election consulting services and election campaign management in line with China's national conditions based on our **democratic election campaigns with Chinese characteristics**.”

I began investigating Eugene Yu on August 13, 2022.

Catherine Engelbrecht of TrueTheVote and Gregg Phillips of OPSEC brought together about two hundred “researchers, independent journalists, and big thinkers” to share the story of their 15-month involvement with what was characterized to them as a “counter-intelligence operation” with the Federal Bureau of Investigation into Konnech.

Unlike so many corporate journalists, who unfortunately have become stenographers for the U.S. government and corporations that pay them, I looked into Konnech.

Click photo to read article.

I found what caused Engelbrecht and Phillips to warn the FBI that Konnech is a "major national security risk." What was even more disturbing was that, according to Engelbrecht and Phillips, the FBI's Washington D.C. office attempted to cover up this national security issue rather than investigate why Chinese nationals are programming U.S. election software. "The problem is they know about this and chose to do nothing," Phillips said. "They chose to investigate it, and in the end, they chose to blame us, but this is China. These are Chinese operatives in the United States; these are Chinese citizens who are programming this."

Click photo to read article.

Consider that Eugene Yu registered numerous Chinese websites to his Konnech email addresses, including "hongzhengtech.cn."

This website belongs to Jinhua Hongzheng Technology, an election software company that is the premier voting technology provider for China's National People's Congress. With more than 200 employees, Hongzheng Technology is partnered with Lenovo, Huawei, China Telecom, China Unicom, and China Mobile and operates in more than 20 provinces across China. Suppose New York Times reporters or FBI agents want to investigate Eugene Yu's Konnech.

In that case, they can check Hongzheng Technology's page on "weibo.com," China's version of Twitter, where they will find how Konnech, Eugene Yu, Yulian Network, and Hongzheng Technology are connected.

Scroll down five posts to April 2016, and click on the introduction page. The company describes how it provides "election, voting, voting-related software products and overall solutions" for China's National People's Congress.

Jinhua Hongzheng Technology then writes:

> 它的前身"金华宇联网络科技有限公司"（**Konnech.,Ltd**）成立于2005年11月， Its predecessor **"Jinhua Yulian Network Technology Co., Ltd." (Konnech., Ltd)** was established in November 2005.

It is a software company that has been **engaged in software offshore outsourcing services for more than ten years**.

The overseas customers served include **more than 20 government customers in North America** including Washington, D.C., and Edmonton, Canada.'

Introduction of Jinhua Hongzheng Technology Co., Ltd.

April 14, 2016 08:53 | read 23

Jinhua Hongzheng Technology Co., Ltd. focuses on providing election, voting, voting-related software products and overall solutions for domestic government agencies at all levels, the National People's Congress, the Chinese People's Political Consultative Conference, the Federation of Workers, Youth and Women, organizations and associations, and large enterprises and institutions. It is used to sign-in attendance, motion voting, report review, democratic evaluation, cadre assessment, merit voting and other meeting needs. At the same time, we can customize functions according to customer needs and build an intelligent mobile e-government information platform.

Jinhuahong is pursuing the corporate culture of "care, pragmatism and innovation". Its predecessor "Jinhua Yulian Network Technology Co., Ltd." (Konnech., Ltd) was established in November 2005. It is a software company that has been engaged in software offshore outsourcing services for more than ten years. Partner (Silver Partner) and 6-year Apple (Apple) enterprise software developer (iOS Enterprise Developer), with multiple software copyrights and product invention patents.

The overseas customers served include more than 20 government customers in North America including Washington, D.C., and Edmonton, Canada.

[Translated Google and DeepL]

On the bottom of the page, Hongzheng Technology features Chinese characters scrawled below the official seals of; Washington D.C., Loudoun County, Virginia, Detroit, Michigan, St. Louis, Missouri, Prince William County, Virginia, St. Charles County, Missouri, Hillsborough County, Florida, Edmonton, Alberta, Regina, Saskatchewan, and the State of Montana.

You can find the same seals on a 2016 archived version of konnech.com.

Although, Eugene posted the seals on Konnech's website without the "Chinese characteristics." So if you want to investigate Eugene Yu and Konnech, start here with this link to Hongzheng Technology's Chinese Twitter.

Then check out Hongzheng Technology's website hongzhengtech.cn (active) and Yulian Network's website yu-lian.cn (archived).

WHOM ELSE IS WRAPPED UP WITH THE PRC

Mind you when it comes to nation state actors, I'm only speaking of the China threat. Today I'm totally leaving out the Russian influence and ideological subversion operations by both Russia, Iran, and little old Cuba and not speaking of North Korea. Today, I won't elaborate on Al Qaeda,

Hezbollah or Hamas or the Muslim Brotherhood from which they were all born and established from. "**However, I will make note that they are ALL present within U.S.borders and have active operational cells."-** J.Robert Not much thanks to DHS Secretary Alexandro Mayorkas our border has been left completely unsecured for three + years, leaving an open gateway for adversarial threats to walk and waltz right in though the border almost completely unchallenged and unvetted. He was impeached once, but not for high crimes and treason like I would charge him with. His methodical actions have resulted in a complete steady INVASION of the USA. Mayorkis is of Cuban/Jewish descent, it is unknown where his loyalties lay, but it doesn't appear by his actions, that his intent is to keep secure the Homeland, but rather leave it completely unsecured letting in millions a good portion of which are bonafide foreign terrorist and associates, convicted murderers, rapist, pedophiles, mental institution and Insane Asylum early releasees. There appears to be no loyalty to the Constitution either let alone the people's safety and citizenship he is betraying. You may wonder what this has to do with China. Well the Biden border policy came from some outside anti-American entity most highly likely the WEF and U.N, which are globalist entities. China was one of five founding members of the UN.

THE BORDER CRISIS

An article from the **"Diploma**t" confirmed my suspicion along with many other credible sources on the subject. 'The optimism of neoliberalism has been challenged by rising concerns about China playing a more active role in the United Nations (UN) and its specialized agencies. Currently, four of the 15 UN specialized agencies are headed by Chinese nationals, including the Food and Agriculture Organization (FAO), the International Telecommunication Union (ITU), the United Nations Industrial Development Organization (UNIDP), and the International Civil Aviation Organization (ICAO). And with its contribution rising to 12 percent of the UN regular budget, passing Japan at 8.5 percent, **China is currently the second-largest monetary contributor to the UN.'**

China's greater leadership role in the United Nations* has triggered the suspicion that it might take advantage to transform the organizations in ways that fit its interests. The suspicion about China's expanding role in the UN has solid foundations, as Beijing has been assimilating its grand geopolitical agenda, the Belt and Road Initiative (BRI), into the United Nation Sustainable

Development Goals (UN SDGs), silencing the critics of its human rights record, providing monetary incentives to secure the support of other member states, and bringing more of its nationals into the UN.'

World migration report https://publications.iom.int/books/world-migration-report-2024

September 18, 2024

'WASHINGTON, D.C. – Today, the House Committee on Homeland Security majority, led by Chairman Mark E. Green, MD (R-TN), released a comprehensive new report documenting how President Joe Biden, Vice President and Biden-appointed "border czar" Kamala Harris, and other administration officials schemed together to open our borders, gut interior enforcement, and spark a historic flood of illegal immigration—from immediately after the 2020 election through the present day.

Earlier this week, the Committee also released new material from transcribed interviews conducted over the last year with former acting Customs and Border Protection (CBP) Acting Commissioner Mark Morgan, former Border Patrol Chief Rodney Scott, and chief and deputy chief patrol agents responsible for managing the Border Patrol's nine Southwest border sectors. These interviews further established the historic nature of the crisis, and how the Biden-Harris administration's policies have unleashed unprecedented chaos.'

"Since January 2021, the American people have watched in horror as Biden and Harris have opened our borders, tied the hands of DHS law enforcement, and left our communities to deal with the consequences. This report serves as a reckoning for them," **Chairman Green said** upon the report's release. *"The evidence makes one fact inescapably clear—this crisis was intentional from the very start, and all its disastrous impacts preventable and unnecessary. As the 118th Congress draws to a close, it is essential that the American people have the whole story on how this crisis began, and how the Biden-Harris administration has allowed it to rage on to this day.*

My Committee will continue fighting for the American people to ensure accountability, and to do everything we can to end this crisis, secure the border, and reduce the mass illegal immigration that threatens the safety, security, and sovereignty of our nation." Me yawning!

Read the full report here. Read the transcribed interview selections here.

On Wednesday, the former chief patrol agent for the Border Patrol's San Diego Sector told the Committee that he was prevented from talking about the increase in these threats crossing the border. Chief Aaron Heitke testified, "I was told I could not release any information on this increase in [Special Interest Aliens] or mention any of the arrests. The administration was trying to convince the public that there was no threat at the border."

'One issue that alarmed all of us on this trip was the nature in which foreign terrorist networks are utilizing criminal smuggling networks to help facilitate their travel from the Middle East and Central Asia to the Western Hemisphere. These elaborate smuggling operations are utilizing both commercial and private means to coordinate this travel.'

'This smuggling network was also highlighted in Director Wray's testimony during the Senate Intelligence Committee's annual Worldwide Threats Assessment hearing. Specifically, he stated that "there is a particular network where some of the overseas facilitators of the smuggling network have ISIS ties that we're very concerned about, and that we've been spending an enormous amount of effort with our partners to investigate." His acknowledgment of this threat shows the gravity and seriousness of this threat, which is why we are here today.'

In his opening statement, Chief Heitke unveiled the shocking revelation that 'Biden and Harris' policies so overwhelmed the Border Patrol that upwards of 80-90% of agents were completely pulled away from the border to process and release historic numbers of border crossers: '

*"**Sectors were ordered to take in and process all the illegal aliens encountered on the border.***

The Border Patrol saw groups of hundreds and thousands coming into the United States and turning themselves in. These numbers pulled 80-90%, sometimes 100% of the agents on duty away from the border. Border Patrol zones across Texas, Arizona and California had no agent presence for weeks and months at a time. Those who did not want to be caught could simply walk in. We have no idea who and what entered our country over this time. Throughout 2022 and 2023 I sent agents to Texas and Arizona to count gotaways. Those sectors could not even put enough agents in the field to see what they had missed."

Heitke also dropped another bombshell, revealing that senior officials forced him and his fellow agents to keep quiet about the massive increase in crossings by illegal aliens with ties to terrorism:

*"Simultaneously, in San Diego we had an exponential increase in **[Special] Interest Aliens (SIAs)**. These are **aliens with significant ties to terrorism.** Prior to this administration, the San Diego sector averaged 10-15 SIAs per year. Once word was out that the border was far easier to cross, San Diego went to over 100 SIAs in 2022, way over 100 SIAs in 2023 and more than that this year. These are only the ones we caught. At the time,* ***I was told I could not release any information on this increase in SIA's or mention any of the arrests. The administration was trying to convince the public that there was no threat at the border."***

*"From September of 2023 to June of 2024, over 155,000 adults, predominantly males, between the ages of 18 to 35, **who crossed our border illegally were bused and dropped onto the streets of San Diego County.** That's an average of almost 600 per day, seven days a week for **nine months**.*

*"Our Border Patrol has been reduced to processing agents, standing by, watching people break our laws. One officer told me with deep frustration that his **orders** from the federal government **were clear**:* ***Stand down,*** *do not engage, just process. What's more alarming is what my team saw*

later, [which] were dozens of Chinese nationals dragging luggage down dirt roads at night. And this is not an isolated incident. This is a daily reality in San Diego County. Border Patrol has become their Uber driver from the border into the city of San Diego, and San Diego County has become their nationwide travel agents at the taxpayers' expense."

The Biden camp utilizes Non-Governmental Organizations (NGO's) to traffic humans into the U.S. It has been reported by at least three outlets that approximately 300,000 immigrant children have gone completely missing and are unaccounted for and many of the sponsor families that the kids have been released to for care, were actually MS-13 & 18th Street gang members and other criminal actors indicating the exploitation of 'Unaccompanied Alien Children' (UAC), which are being exploited for sex trafficking, child labor and slavery purposes. DHS is fully aware of this, "the U.S. government has become the middleman in a large scale, multibillion-dollar child trafficking operation that is run by bad actors seeking to profit off of the lives of children," according to whistleblower Tara Lee Rodas testimony HERE. **(See J.J Carroll's reporting as well as REDACTED and Michael Yon.)**

Background

Senator Chuck Grassley for a decade has led congressional oversight examining federal care of unaccompanied minors. Based on information he obtained from HHS whistleblowers via legally protected disclosures, Grassley in January shared with law enforcement evidence of potential child trafficking and smuggling facilitated by the Biden administration's UC program. He also demanded HHS make immediate changes to address its unlawful policies, which seek to prevent legally protected whistleblower disclosures to Congress and the HHS Office of the Inspector General regarding misconduct at HHS and in the UC program.

Dan Moore, U.S. Border Patrol Agent

Nicole Cubbage, Former Acting Director of HHS' Office of Refugee Resettlement

Frank Russo, Associate General Counsel and Director of the Center for Combating Human Trafficking

Federation for American Immigration Reform

On the flip side of the coin, there are Iranian intelligence operatives (MOIS) and likely Iranian Quds Forces (IRGC) operatives likely by the dozens, maybe more, some which have been tasked with targeting and assassinating former Trump administration officials, specifically John Bolton, and Michael Pompeo the former Secretary of State at DOS and agency Director. These assassination plots are attributed to the 2020, targeted drone strike that killed former IRGC Secretary Brig. General Qasem Soleimanii and others, to include some Hezbollah leadership. The Ayatollah promised revenge for killing his right hand man and long time friend Gen. Soleimani..

They're all (AQ, Abu-Sayaf, Hamas, Hezbollah, IRGC) here in the U.S. awaiting specific "GO"orders from PRC, Iran, MB or Hezbollah top brass to execute their strike orders; upon the United States citizenry, both hardened and soft targets are fair game in their minds. Should the timing within the Israel/Hamas/Iran war call for it, by conflict escalation this could be tragic. To date there's been at least three terror probing assaults on military installation main gates.

There's been reported hundreds of attempts by Chinese nationals pretending to be lost visitors attempting to intelligence probe or bypass security controls at secure government facilities and contractors. Senior Al Qaeda members have been spotted several times living in Iran, where they have sought safe haven from drone strikes. Hiding in plain sight, where we wouldn't expect them to be. One of those is the new assumed al-qaeda-chief successor **Saif Al Adel** who is a 62 year old Egyptian . Al Adel was last spotted in Afghanistan. A former agency 'targeter' has specifically indicated that bin Laden's son Hamza is still alive and well in Afghanistan and so may be (allegedly killed) AQ cleric Anwar al-Awlaki who has also been spotted by sources,

sometimes in public. AQ has already vowed support for the Hamas attack and conflict and urges followers to inflict acts of terror on the west. **'The October 7th Hamas terror attackers all received their individual tactical training in newly rebuilt and established terror training camps located in several regions of Afghanistan.' -Sarah Adams**

Photo Credit: Sarah Adams, Askari Media

The Taliban and AQ are now one in the same due to further integration. I just learned from the Shawn Ryan show who had a guest nicknamed "LEGEND" and Sarah Adams of Askari Media Group, that there are now sixteen (40+) operational AQ training camps present in Afghanistan, including approx sixteen thousand + (50k) trained terrorists who plan to eventually march on Israel in support of Hamas (unverified). Thousands of jihadis a month are flocking to Afghanistan for tactical terror training. I still have to research, but as usual, it's related to Islamic, biblical and Shia twelver history and the Mhadi army.

Additionally, according to 'Legend' senior members of the Haqqani Network are in charge of passport distribution in Afghanistan since a few senior Haqqani assumed positions in the Afghan government, including Sirrudin Haqqqani. So who knows how many AQ terrorists are present in the U.S. coming through border checkpoints, seemingly legal, but actually on fabricated, modified, subversive data infused passports all legally issued according to Taliban law. What happened to this 'over the horizon capability' we supposedly have had in the region since our

intelligence apparatus (CIA bases) were removed (abandoned) from the Afghan region? **Even if we end up going back to Afghanistan we will be facing Taliban & AQ that are utilizing our own equipment that the Biden administration left behind and abandoned weapons systems (primarily night vision capability (NVGs), but also Thermal Weapons Sights, full Biometrics Systems and databases and other electronics. So much for the saying, "We own the night."-J.Robert**

To make matters worse, as soon as we departed Afghanistan in haste, resulting in 13 U.S Marines being killed via IED and hundreds blast casualties mostly civilians and the foolish abandonment of Bagram Air Base, China almost immediately swooped into the region to strike many types of deals and cultivate further relations with the Taliban. I'm sure some of those relations involve the Taliban selling NVG and thermal optics to reverse engineer along with a BlackHawk or two.

MORE ON UNRESTRICTED WARFARE

'General and Doctor Robert S. Spalding is the number one expert I trust to brief on the issue of the CCP, his unique insight having lived and studied in the PRC sheds massive light on the subject, as is portrayed in his books, especially "Stealth War"' J.Robert

I am very thankful that Brig.Gen Spalding didn't just retire into the sunset when his military career ended. He's written books, testified in congress, done News and Podcast interviews to get

his observations to the right people. I'm sure he has briefed leaders at the highest echelons of our government. However, while some may be heeding his warnings, it's clearly not many in government. **I suspect just as many have warned about the Jihadi and internal Islamist threat for two decades. It's highly likely to fall on deaf ears, because we are too preoccupied starting new wars in other lands, our attention is not focused on the homeland. This is highly likely what China expects us to continue doing as they just watch and observe while making many strides in its objectives.**

'In terms of beyond-limits warfare, there is no longer any distinction between what is or is not the battlefield. Spaces in nature including the ground, the seas, the air, and outer space are battlefields, but social spaces such as the military, politics, economics, culture, and the psyche are also battlefields. And the technological space linking these two great spaces is even more so the battlefield over which all antagonists spare no effort in contending.3 Warfare can be military, or it can be quasi-military, or it can be non-military. It can use violence, or it can be nonviolent. It can be a confrontation between professional soldiers, or one between newly emerging forces consisting primarily of ordinary people or experts. These characteristics of beyond-limits war are the watershed between it and traditional warfare, as well as the starting line for new types of warfare.'-Unrestricted Warfare

'In addition, we urgently need to expand our field of vision regarding forces which can be mobilized, in particular non-military forces. Besides, as in the past, paying attention to conventional, material forces, we should also pay particular attention to the employment of intangible "strategic resources" such as geographical factors, the role of history, cultural traditions, sense of ethnic identity, dominating and exploiting the influence of international organizations, etc.13 But this is still not enough. In applying this principle we must also come up with beyond-limits action, and to the greatest extent possible make multidimensional coordination a commonplace move in ordinary operations, and bring about interlocking, gradational combinations at every level from war policy to tactics.'Unrestricted Warfare

We certainly have a diverse group of actors interested in our western demise. The CCP's 'Unrestricted Warfare' theory or doctrine explains that all forms of warfare should be utilized at any given time including partnering with other enemies. That is, 'Unrestricted Warfare' is the

use of Diplomacy Unconventional, Conventional, Nuclear, Information, Cyber, Chemical, Biological, Economic, Psychological, and Political **warfare** to complete said mission objectives. I would argue that this 5th generation war is likely the first World War, where so far, primarily, only unconventional, irregular war is being waged and the tactics being employed against us are totally asymmetric in nature. The Russia, China, Iran axis in addition to N.Korea, Cuba and Turkey, a heavily armed and a geographically strategic NATO member country, is now turning to BRICS economically, away from the U.S. dollar.

No matter how I look at it, both current and former U.S. military leadership have sounded the alarm within the U.S. but their calls seem to fall on deaf ears. People like Major General Paul E Vallely US Army (Ret) who is warning of an internal attack this year, along with former military and subject matter experts John Guandolo, Lt.Gen. Michael T. Flynn,U.S Air Force Brig.Gen. Robert S. Spalding (ret) or Dr./LTC Stephen Caughlin or Air Force (ret), General Mike Minihan, and others like Ltc. Allen B. West, U.S Army (ret) who all predict or claim we are currently in an American Insurgency, or we'll either be at war with China by 2025 or at war internally, with one side partially commanded or influenced by a foreign entity, but realistically all the above could kick off at any moment and some claim it already has.

A war like this is necessary in order for the superpowers to engage in what is called the "Great power competition" (GPC) where we compete with our near-peer adversaries and with other nations to maintain our current, but highly lacking position as the global leaders of the free world. This is why the U.S. Army is focusing on Multi-Domain Operations and essentially adjusting their portion of the overall Joint Services strategic battle plan. **Every theater of war, whether conventional or irregular, must be prepared for asymmetric attacks within all theaters, from within multiple domains, but primarily the human domain.**

However, since the World Economic Forum leader (Maoist/ Tedros) would like China to lead the NEW world order (NWO), if by chance we win this GPC , the United States still will have been, "Fundamentally Transformed", per Barack Obama's and WEF intentions. If America doesn't

wake up to this almost complete communist take over (Kamala Harris- Marxist/Tim Waltz is Communist). We (the U.S.) will very much resemble the CCP per Klaus Schwab & WEF wishes and soon we'll all be learning and speaking Mandarin and praising president Xi whom I firmly believe should kiss my American ass!. It seems the U.S Constitution and "The People" are the only things standing in their way as they actively work to subvert and bypass both each day.

UPDATE:
That was my last installment. Here's as update as of 09/13/2024
Let's see. Hitting rewind Joe Biden severely lost a debate with DJT that was aired semi-publicly hosted via CNN. All types of stipulations were placed by the Biden regime. Trump agreed anyway despite odds not in his favor. They couldn't hide Joe's inability to respond coherently, everyone saw his lack of cognition that had been nefariously, poorly, hidden from the world these last three years. Democrats and others demand he step down as the nominee he refuses.

So then everyone is behind Biden all the sudden even though there's no way they'll have him as nominee again, so they turn on him, he disappears for 6+ days, then contracts Covid as a cover to avoid even more public statements. Then a digital letter of resignation appears with no presidential seal and a signature that doesn't seem authentic. I guess I left something out. On July 13th, 2024 former 45th U.S. President and potential future President (if he can stay alive) almost had his life taken at a rally in Butler, Pennsylvania. The failed assassin, allegedly a 20 year old ANTIFA member, but being portrayed by media as a Trump supporter (confirmed false), had his cranium enclaved by a ESU counter-sniper or member of local police on special assignment. Before he was shot he allegedly rattled off 8 shots at Trump. Audio/video evidence is being analyzed by public entities because there is NO public trust for the FBI, DOJ, SS, DHS etc by the public. Agencies are pointing fingers at each other. Its been confirmed that they were aware of this threat 26 minutes prior possibly an hour, but that they lost sight of him. Suspect had been previously identified utilizing a range finder used mainly for competition shooting, game hunters, and police/military/terrorist snipers, this was dismissed as normal behavior by SS.

The Secret service director (Kimberly Cheatle) finally resigned and admitted some of the security failures, which were far too many to be coincidental, she likely resigned to avoid impeachment or dismissal. Several career special operations snipers came forward to give analysis. Two of them are congressmen, Rep. Eli Crane and Rep. Cory Mills who's service record is questionable. To say that some punk, untrained, 20 year old was permitted close enough to punch a hole through DJT's right ear and barely missed totally eliminating him, is an EPIC failure on the part of his "Advance Team" protection detail. Whoever did the event pre-planning and mapping and walk through failed to identify threat vulnerabilities such as the AGR roof, and the Water Tower among many others that were identified post incident. Due to this, an innocent bystander was killed protecting and shielding his loved ones. His name is Cory Comperatore (SP?) was a retired volunteer Fire Chief just trying to have a good time at a rally with family. There are two others critically struck by gunfire and recovering. The internet is propagating conspiracy theories due to the lack of communication and transparency being shown by SS and FBI.

Update : 2

In addition to this, according to the federal government there are 5 entities trying to kill DJT. Three of them are considered foreign. At least one being Iranian, perhaps more and two domestic assassins. A second attempt was thwarted at the Florida Trump International Golf course where a sniper lye in wait for 12 hours with a 1- semi-auto AK variant rifle, outfitted with optic, 2-blk backpacks, floor tiles to act as makeshift armor and go-pro camera tied to fence in preparation to record the event. Vehicle was staged surreptitiously near the road as a quick egress vehicle and evac route.

Below are excerpts from Sam Faddis, a former career intelligence professional I follow. I

Ausa commission report article

https://www.ausa.org/news/commission-issues-dire-warning-about-threats-facing-us

"Our borders no longer exist. Every security service on the planet is sounding the alarm regarding the rising threat of terrorist attacks in the West, and the woman who wants to be President thinks we are being too harsh in our use of terminology. It would almost be amusing if it were not all so serious. Joe Biden fled Afghanistan and turned it over to the Taliban. They created what amounts to a terrorist super state. Inside this safe haven radical Islamic terrorist groups are organizing, training, and preparing to unleash hell on the West. Recently the ***Special Operations Association*** *sent a letter to Congress highlighting the growing danger.*

Drawing on information obtained from resistance groups in Afghanistan the Association expressed its "profound concern about the deteriorating security situation in Afghanistan and its implications for U.S. national security." The letter went on to highlight these specific concerns:

"1. Imminent Threat to U.S. Security: Afghanistan is once again becoming a breeding ground for terrorist activities aimed at the U.S. The violations of the Doha Agreement have led to the resurgence of multiple terror safe havens. "
"2. Strengthening Terrorist Alliances: The relationship between the Taliban, Al-Qaeda, and ISIS-K has deepened. Intermarriages among members of these groups have created a unified and formidable terrorist network, reminiscent of the alliances formed by key terrorist leaders in the past."

"3. Misuse of Humanitarian Aid: It has been confirmed that over $40 million in U.S. humanitarian aid is being funneled weekly to the Taliban-controlled Afghan government and corrupt NGOs with known ties to terrorist
leaders."

"4. Re-emergence of Terrorist Training Camps: The Taliban's control has facilitated the establishment of over 20 new terrorist training camps, further entrenching their power and capabilities." Ahmad Massoud, leader of the National Resistance Front (NRF), an armed opposition group to the Taliban,
has given a number of interviews recently in which he too has sounded the alarm and specifically highlighted his concern that terrorist attacks inside the United States are imminent.

In an interview with the Daily Mail Online on Monday, April 29, Mr. Massoud stated that terrorism was "breeding in the vacuum" left by the U.S. withdrawal from Afghanistan in August 2021. He warned that terrorist groups were now intent on striking targets in the U.S. and Europe.

"They are expanding and they're recruiting. They are recruiting more and more people inside Afghanistan to be foot soldiers for many other terrorist groups," Mr. Massoud said. "An attack on U.S. or European soil is very much possible now. It is not about a matter of if, it's a matter of when," he said.

It is worth noting that Massoud's father attempted to warn the United States of what was coming prior to 9/11.

He was ignored. We all paid the price. Massoud is hardly alone in his concerns. Recently, General Frank McKenzie, former commander of the US Central Command (CENTCOM), cautioned that IS-KP has a strong desire to launch attacks on the U.S. and its allies and characterized such attacks as "inevitable." Speaking to the Independent, Ali Maisam Nazary, the head of foreign relations for the National Resistance Front in Afghanistan, a group fighting the Taliban, noted:
"The Taliban's pursuit to build three-four jihadi madrasas in each of Afghanistan's 400 districts will radicalize and indoctrinate more than a million youth within the next five years if they survive…The return of the Taliban has started the fourth phase of terrorism and jihadism around the globe by emboldening the narrative and giving all terror groups a strategy and optimism that they can defeat or at least bring their enemies to the negotiating table."
Meanwhile, we continue to receive reports of individuals with known Islamic terrorist links being detained at the southern border. We have literally no idea how many more have simply walked across without being intercepted. We have no idea where they might be or what they might be planning. A couple of weeks ago we saw that our Secret Service could not protect Donald Trump against what can only be described as a very low-level threat. A young man with obvious mental problems and a rifle literally
walked right through security and almost succeeded in assassinating the former President of the United
States. Our intelligence and security services have been rendered impotent by the policies of this government. The people that Al Qaida, ISIS-K, and other radical Islamic groups will be sending here or have already sent are not rank amateurs. They are trained. They are committed. They have full sets of false identity documents. They have access to safe houses and casing packages and can likely draw on prepositioned explosives and
weapons caches.

They will not bumble around in plain view with a rangefinder almost begging to be arrested. They will exercise patience, plan carefully, and when they attack they will kill perhaps thousands of Americans. They may do so with conventional explosives. Given the open nature of our border they may come with a lot more than just Semtex. We are out of time. We need to change course quickly or pay the price. Just watch your language. Kamala wants to make sure we don't hurt anybody's feelings.

SOURCE; Sam Faddis @ AND Magazine

With global IT outages, stock market crashes, open borders, attacks on Jews worldwide, and assassination plots against President Trump unfolding on a regular basis, many people know instinctively that something very bad is happening to America and the world. But retired Army Lieutenant Colonel Ralph Siegrist is warning that the worst is yet to come, as "sleeper cells" of foreign attackers are inside the

United States, preparing to assassinate ordinary Americans resisting a New World Order dominated by Chinese Communists, radical Islamists, and their American friends.

In a dramatic and frightening presentation at the August meeting of the Frederick County (Maryland) Conservative Club, Siegrist put the number of foreign men of military age inside the United States at 84,000, declaring "We are outnumbered at home" and vulnerable to a physical invasion and takeover.

They have arrived here through the open borders policy of the Biden/Harris Administration.

Siegrist, an Army retired Lieutenant Colonel of 28 years, is part of a group of 17 retired military officers traveling the country educating citizens on emergency preparedness. He urged citizens to buy medical first aid kits, arrange for emergency supplies of food and water, get armed, and know how to escape the big cities and survive when the power grid goes down.

Using a slide show to illustrate current conditions and demonstrate how prepper supplies can make the difference between life and death, the West Point graduate highlighted the battle between freedom and communism as it is happening in America today and the need to protect one's family, friends, and neighbors. He emphasized trust in local officials, getting to know your sheriff and emergency responders and firefighters.

During a question-and-answer period after the speech, he issued even more ominous warnings, saying existing "hatred" in America toward conservatives, especially white people, would be carried out in real terms by the invaders, "most of whom are Chinese" and "a lot of them are from the Middle East."

"We have caught them at rifle ranges training as a squad," he said. "We're talking about eight guys with an instructor, all Chinese."

Asked about the July 13 assassination attempt on Trump and the alleged would-be assassin, Thomas Crooks, he said, "He's a patsy. He didn't do it." He said the actual perpetrator or perpetrators have not yet been identified or caught.

Others disagree, noting that Crooks was highly trained and practiced shooting at the same gun range used by the Department of Homeland Security. Talk of "security lapses" by the Secret Service could mask a deliberate effort to obscure the truth about how federal agencies are trying to take Trump out of the presidential race.

Judicial Watch announced on August 12 that the FBI is withholding information on a Freedom of Information Act (FOIA) request for information about its coordination with the U.S. Secret Service regarding the July 13 rally.

The open borders policy of the Biden-Harris Administration may be implicated in this ongoing scandal, as Senator Charles Grassley wonders how a Pakistani with ties to Iran, Asif Raza Merchant, was allowed to enter the United States, to plot to kill Trump.

John Solomon of Just the News reported, "The FBI's Joint Terrorism Task Force interviewed Merchant, fingerprinted him and inspected the contents of his electronic devices when he arrived at the George Bush Intercontinental Airport in Houston, but then let him leave with the special parole that expired on May 11, the [government] memos state."

Incredibly, in one of the latest examples of official malfeasance, two illegal Jordanian migrants charged with trying to breach Marine Corps Base Quantico in May were allowed to go free.

Showing a slide of America's crushing debt and federal spending leading to massive inflation of the nation's currency, Siegrist declared "We are going to crash," a scenario that could usher in more domestic chaos and turmoil, as America's enemies rush to exploit the situation.

He used phrases such as "When these people hit" and "When everything goes bad," forecasting the final push to destabilize and destroy America, and emphasizing that the invaders already on American soil are counting on untrained and undisciplined people to crush and overcome.

President Biden has reportedly altered the U.S. strategic nuclear plans toward opposing China's burgeoning nuclear arsenal and preparing for possible nuclear coordination between China, Russia, and North Korea.

According to a report Tuesday evening in The New York Times, the highly classified "Nuclear Employment Guidance" was altered in March without any public announcement.

"The document, updated every four years or so, is so highly classified that there are no electronic copies, only a small number of hard copies distributed to a few national security officials and Pentagon commanders," the Times reported.

Congress is expected to be notified of the changes in unclassified form before Mr. Biden's term in the White House ends in January.

But, The Times reported, two separate top officials have received permission to refer to the changes in public speeches, albeit only in "carefully constrained, single sentences."

"The president recently issued updated nuclear weapons employment guidance to account for multiple nuclear-armed adversaries," said Vipin Narang, a Massachusetts Institute of Technology nuclear strategist who served in the Pentagon.

"In particular," he added, the guidance reacted to "the significant increase in the size and diversity" of China's nuclear arsenal.

Pranay Vaddi, the National Security Council's senior director for arms control and nonproliferation, referred to the document in June, saying it emphasizes "the need to deter Russia, the PRC, and North Korea simultaneously," using the acronym for the People's Republic of China.

Pentagon officials have warned for years about a nuclear arsenal breakout from China.

Although Beijing has had nuclear weapons since the 1960s, for decades it had only a minimal deterrent force that barely measured up to the arsenals of Britain and France, much less those of the U.S. or the Soviet Union/Russia.

But the commander of U.S. Strategic Command, Air Force Gen. Anthony Cotton, testified to Congress in February that the size and rapid pace of Beijing's nuclear buildup is "breathtaking."

Current Chinese strategic stockpiles are estimated to be around 500 warheads and will increase to as many as 1,500 by 2030, with the most dramatic move being the building of more than 300 intercontinental ballistic missile silos in western China.

DOMESTIC SECURITY RESPONSE CONCLUSION

Kamala Harris & Tim Waltz are both a direct threat to our Republic. Waltz has direct connections to the CCP and the Islamist movement and a long history.
According to a recent 'Daily Caller' investigation, "*Since 2018, Walz has attended multiple events hosted by members of the Chinese American Association of Minnesota (CAAM) and related organizations, including one 2022 fundraiser for his gubernatorial campaign, according to a DCNF review of dozens of Chinese government announcements, Chinese-language news reports and social media posts.*

Other media have detailed self-declared progressive Walz's long-standing relationships with entities connected to Islamic extremism as well.

Since 2016, CAAM and another local nonprofit have been hosting the St. Paul branch of the "Overseas Chinese Service Center" (OCSC) program, which is a global network of institutions overseen by the Chinese government's United Front Work Department (UFWD), the DCNF previously reported.

Among other things, the UFWD "collects intelligence, exerts control over overseas Chinese-language media outlets, seeks to influence Chinese diaspora groups, facilitates illicit technology transfer, and interferes in politics in other countries," according to the House Select Committee on the CCP.

Aside from the fact that we (United States) are currently under communist/marxist influenced rule. Our complete intelligence apparatus requires a full overhaul in many respects. Starting with the FBI domestically, and CIA internationally, all politicization and focus on domestic work involving U.S citizens should take a step back, analyze and make stringent determinations on what constitutes imminent or future threats and are actually currently presenting one, and require further continued focused collection or actions. Also take the rest of both remaining apparatus' resources and focus them specifically on our real adversaries namely Afghanistan, China, Russia, N. Korea, Iran, and Pakistan and maybe even a little peek at Tajikistan, Turkmenistan and Uzbekistan. Our complete counterintelligence capability is broken. Must be totally rebuilt. An

immediate analysis is required to determine which infiltrators have penetrated our private/public infrastructures. A good starting point would be current foreign nationals enrolled in U.S. universities then start determining who graduated and gone on to work in government or industry. That all starts with having objective yet realistic type critical thinking and forward propelled action. DEI only complicates matters, using the Secret Service as a prime example of what failure looks like. We need first examine, then deport immediate threats that have been let in through both borders. This includes those that came illegally in the last 6 years, convicted criminals, suspected operatives conducting espionage, suspected espionage, **terrorism** and likely **insurgency** related activities. I say something just short of Mccarthyism should be implemented to weed out all communist, marxist and socialist. A purge from the government and possibly jail in some instances for subversion especially those working on behalf of a foreign entity, such as China. This type of action must take place in order to restore our republic. There are several members of congress that fall into the aforementioned categories. Once we've taken out the trash and refocused our efforts on actually securing and defending this nation, we need to keep that border secure 24/7 and continue building the wall Mr. Trump almost finished beforehand. Supplemental controls are needed for the wall such as patrol, cameras, and sensors. We should also focus efforts on identification using more field biometrics systems and doing so without infringing on U.S citizens constitutional rights. This process or some form of it is essential to the continued preservation of our constitutional republic.

MILITARY RESPONSE CONCLUSION

NDS SUMMARY

Per the 2018 NDS. ANNEX, there were eight specific lines of effort that were to be pursued by the Joint Forces and each individual SOF force in the preceding years. The LOE established back then were as follows.NDS IW Annex has 8 Lines of Effort

Irregular warfare is to be institutionalized as a core competency with sufficient, enduring capabilities to advance national security objectives across the spectrum of competition and conflict, in alignment with the US will employ these concepts and capabilities in a resource-sustainable approach to dictate the terms and tempo of competition to prevail against all

global adversaries short of war, and build and sustain our global advantage in careful coordination with allies and partners. Should war come, these capabilities will shape the environment to ensure combat dominance and our ability to end any conflict on our terms.

Consequently, the Department of Defense will: (1) make permanent the mindset and capabilities necessary to succeed in its current irregular warfare mission sets; and (2) leverage all irregular capabilities in our arsenal, including the unique abilities of our interagency and foreign partners, to compete against revisionist powers and violent extremist organizations alike. This approach does not require significant new resources to meet our strategic vision; it requires new ideas and new means of employing existing capabilities. We must not — and will not — repeat the "boom and bust" cycle that has left the United States underprepared for irregular warfare in both Great Power Competition and conflict.

Americans expect their military to do more than react to crises, they expect us to compete and maintain our advantages.

'Irregular warfare is a struggle among state and non-state actors to influence populations and affect legitimacy. IW favors indirect and asymmetric approaches, though it may employ the full range of military and other capabilities, in order to erode an adversary's power, influence, and will.'

'It includes the specific missions of unconventional warfare (UW), stabilization, foreign internal defense (FID), counterterrorism (CT), and counterinsurgency (COIN). Related activities such as military information support operations (MISO), cyberspace operations, countering threat networks, counter-threat finance (CTF), **civil-military operations**, and **security cooperation** also shape the information environment and other population-focused arenas of competition and conflict.'

State adversaries and their proxies increasingly seek to prevail through their own use of irregular warfare, pursuing national objectives in the competitive space deliberately below the threshold likely to provoke a U.S. conventional response. China, Russia, and Iran are willing practitioners of campaigns of disinformation, deception, sabotage, and economic coercion, as well as proxy, guerrilla, and covert operations. This increasingly complex security environment suggests the need for a revised understanding of IW to account for its role as a component of great power competition.

IW is a persistent and enduring operational reality employed by non-state actors and increasingly by state actors in competition with the United States. Past U.S. approaches to IW have been cyclical and neglected the fact that IW – in addition to nuclear and conventional deterrence – can proactively shape conditions to the
United States' advantage in great power competition. This reactive cycle fails to prepare the United States to conduct traditional warfare or irregular warfare effectively.'

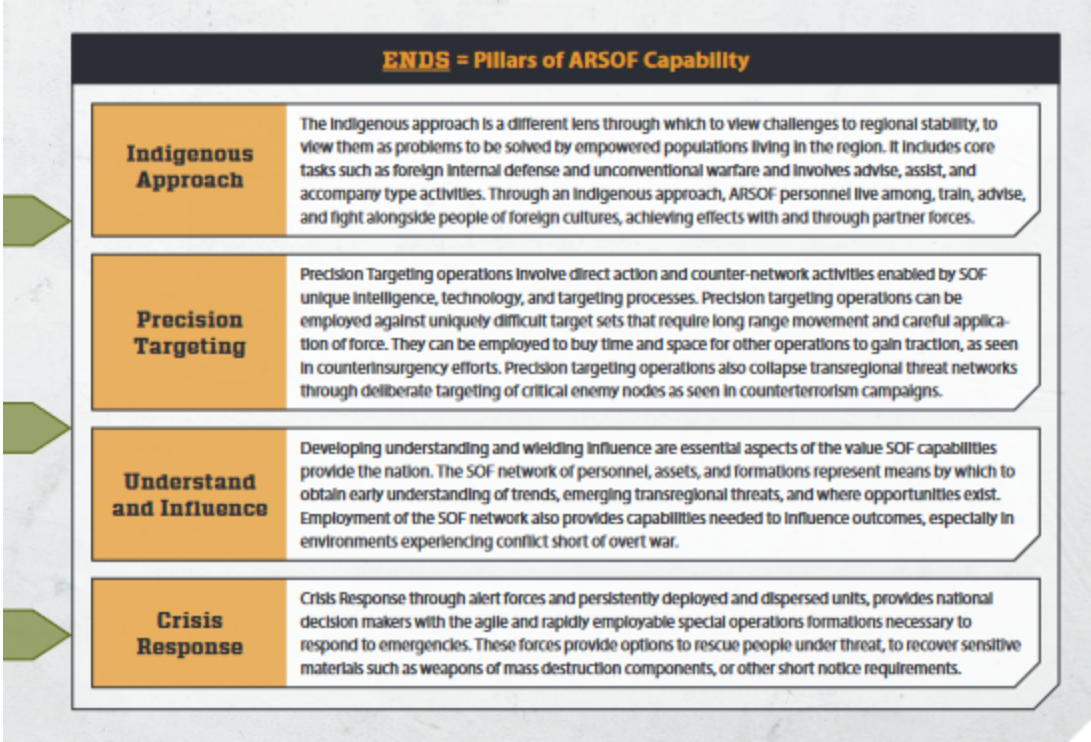
In 2018, up till 2020 we remained ill prepared for the Irregular War, but since then adaptation has been in the works. 'Our adversaries seek to undercut our global influence, degrade our relationships with key allies and partners, and shape the global environment to their advantage without provoking a U.S. conventional response. As we reorient the Department towards great power competition, we do not have the luxury of discarding our well-honed ability to wage irregular war as we have done in the past. For example, the United States entered irregular wars in Vietnam, Afghanistan, and Iraq unprepared to conduct the major counterinsurgency (COIN)campaigns and counterterrorism campaigns that followed.

Conventional forces have executed, can execute, and even lead most IW missions. Conventional forces have supported or led counterinsurgency campaigns in Vietnam, Iraq, and Afghanistan; stabilization missions in Bosnia and Somalia; and other irregular campaigns. Even when special operations forces (SOF) have taken the lead in unconventional warfare, counterterrorism, and foreign internal defense missions, they are heavily enabled by conventional forces.

As we shift towards great power competition, our conventional forces must not lose the ability to wage irregular war. The purpose of Myth: IW is CT – CT is SOF – SOF is IW Reality: Conventional forces have, and always will have, a role in IW across a variety of missions, and a range of military activities.

Competition is not only to gain military advantages, but also to defeat adversaries' strategies, shape their perceptions, and deny their strategic objectives in the pursuit of national interests. Irregular War Requires Unified Action.

ARSOF no doubt will play a leading crucial role in current and future engagements. They have provided a glimpse of what improvement lines of effort (LOE) have taken place with SOF and what the future looks like. The model being used is pillars. They have four pillars of ARSOF capability: after the pillars all the different lines of effort are thoroughly layed out. Each of the objectives in the following section has a reference number at the end to show its corresponding location in USASOC Strategy 2035 which can be found HERE. (example: [READY #1]).



ENDS = Pillars of ARSOF Capability
Indigenous Approach
The indigenous approach is a different lens through which to view challenges to regional stability, to view them as problems to be solved by empowered populations living in the region. It includes core tasks such as foreign internal defense and unconventional warfare and involves advise, assist, and accompany type activities. Through an indigenous approach, ARSOF personnel live among, train, advise, and fight alongside people of foreign cultures, achieving effects with and through partner forces.
Precision Targeting
Precision Targeting operations involve direct action and counter-network activities enabled by SOF unique intelligence, technology, and targeting processes. Precision targeting operations can be employed against uniquely difficult target sets that require long range movement and careful application of force. They can be employed to buy time and space for other operations to gain traction, as seen in counterinsurgency efforts. Precision targeting operations also collapse transregional threat networks through deliberate targeting of critical enemy nodes as seen in counterterrorism campaigns.
Understand and Influence
Developing understanding and wielding influence are essential aspects of the value SOF capabilities provide the nation. The SOF network of personnel, assets, and formations represent means by which to obtain early understanding of trends, emerging transregional threats, and where opportunities exist. Employment of the SOF network also provides capabilities needed to influence outcomes, especially in environments experiencing conflict short of overt war.
Crisis Response
Crisis Response through alert forces and persistently deployed and dispersed units, provides national decision makers with the agile and rapidly employable special operations formations necessary to respond to emergencies. These forces provide options to rescue people under threat, to recover sensitive materials such as weapons of mass destruction components, or other short notice requirements.

LINES OF EFFORT

LOE #1: PREPARE

PREPARE ARSOF to meet the nation's demands. This LOE focuses primarily on USASOC Institutional or Generating Force responsibilities, which are those missions that generate or maintain the operational capabilities employed by joint force commanders. The USASOC mission statement reflects this responsibility as it identifies requirements to MAN, TRAIN, and EDUCATE ARSOF. These requirements comprise the three sub-LOEs for capability development in this section.

>> MAN

Prepare authorized personnel by grade & skill. Sub-LOE manager: USASOC

Deputy Chief of Staff, G1.

READY (Short-Term)

» AC/RC Balance: Identify the right ARSOF Active Component/Reserve Component balance

[READY #6]**INVEST** (Long-Term)

» MIL/CIV Models: Implement alternative military/civilian career models that are more attuned to the demands of the future operating environment.

[INVEST #13] >> TRAIN

Prepare Soldiers and Units. Sub-LOE manager: USASOC Deputy Chief of Staff, G3.

READY (Short-Term)

» Maintain HR/DA: Maintain advanced hostage rescue and direct action capabilities.

[READY #1] MATURE (Mid-Term)

» HR/DA Adaptation: Adapt ARSOF hostage rescue and direct action capabilities to incorporate improved technology, processes, and techniques. [**MATURE #1] » CWMD**

Tracking: Develop capabilities to track, monitor, and counter WMD.

[MATURE #2] INVEST (Long-Term)

Cyber Integration: Integrate Cyber capabilities into operations to include influence operations, digital deception, communication disruption, and disinformation campaigns at the tactical and operational levels. [INVEST #7]

>> EDUCATE

Prepare current & future ARSOF personnel. Sub-LOE manager: U.S. Army John F. Kennedy Special Warfare Center and School.

READY (Short-Term)

» LREC Investment: Invest in language, regional expertise, and cultural capability development. **[READY #7]**

MATURE (Mid-Term)

» Train CWMD: Incorporate education/training into ARSOF learning institutions to enable operations that track, monitor, and counter WMD. [MATURE #3]

» Codify Doctrine: Codify ARSOF doctrine and education for FID, COIN, CT and support to resistance movements (up to and including UW).

[MATURE #7]

» Partner Investments: Invest in education initiatives that prepare operators to develop effective partnerships in foreign cultures and to build partner capabilities.

[MATURE #8]

» Ambiguity Education Models: Create and implement education models that train operations to rapidly integrate into, and excel within, ambiguous environments.

[MATURE #9]

» Institutionalize Hybrid Conflict: Invest in hybrid conflict research/education within ARSOF institutions. [MATURE #10]THE WAY AHEAD

LOE #2: PROVIDE

PROVIDE the nation's premier SOF to JFCs and interagency leaders. This LOE focuses primarily on operational or Operating Force responsibilities, which are those missions that support units in combat or other operations. The USASOC mission statement reflects this

responsibility as it identifies requirements to ORGANIZE, EQUIP, and SUSTAIN ARSOF. These requirements comprise the three sub-LOEs for capability develop-ment in this section.

>> ORGANIZE

Provide trained and ready forces. Sub-LOE manager: USASOC Deputy Chief of Staff, G3.

READY (Short-Term)

» Readiness Model: Develop and implement a new ARSOF Sustainable Readiness Model. [READY #2]

» Improve SOF/CF I3: Improve SOF-CF interdependence, interoperability, and integration. [READY #3]

» Improve JIIM-P: Improve joint, interagency, intergovernmental, and multinational (JIIM) partnerships. [READY #4]

» Build the ARSOF Brand: Improve understanding of the full range of ARSOF capabilities with external audiences. [READY #5]

» Responsive Force: Identify more responsive mechanisms to deploy forces when needed. [READY #8]

>> EQUIP

Provide equipment to trained and ready forces. Sub-LOE manager: USASOC Deputy Chief of Staff, G8.

READY (Short-Term)

» ARSOF 2022 Requirements: Review unfinished ARSOF 2022 objectives; complete valid unfinished requirements . [READY #9]

MATURE (Mid-Term)

» Decentralized MC: Empower decentralized Mission Command (COP and situational awareness via hand-held data, blue force tracking systems, and secure communications). [MATURE #4]

» Increase Clan Tech: Increase ARSOF clandestine and low-visibility technology (mobility platforms, weapons systems, and communications technology – secure, unsecure, and non-attributable systems). [MATURE #5]

» Agile SPP: Streamline resourcing and capability development processes to be more agile/adaptive. [MATURE #12]

INVEST (Long-Term)

» Edge Tech: Procure the technology and weapons systems that keep ARSOF on the cutting edge. [INVEST #1]

» Agile Mobility: Procure mobility systems that are agile enough to quickly deploy, resilient enough to operate in austere environments, and require minimal mainte-

nance/logistics. [INVEST #2]

» Improve C4I: Procure C2 and intelligence technology that improve the speed and ease with which we process/synthesize information at the tactical and operational levels. [INVEST #3]

» Expedite OE Understanding: Procure communications and intelligence systems that facilitate rapid collective understanding of the environment, adversarial actions, and emerging threats. [INVEST #4]

» Decision-enabling: Develop and integrate systems and processes that enable operator/leader level decision making. [INVEST #5

» Population Influence: Develop and incorporate methods and technology that improve USASOC's ability to influence populations and to understand/address how adversaries and their proxies do the same (Cyber and related capabilities). [INVEST #6]

» NEXGEN UAS: Obtain next generation unmanned aerial systems that provide longer operational range, over horizon observation, and can be launched and recovered by tactical units. [INVEST #9]

» NEXGEN Rotary**: Obtain the next generation of ARSOF rotary-wing capabilities for transport and fire support that have longer range and greater fuel efficiency.** [INVEST #10]

» NEXGEN Counter-IADS: Obtain capabilities for ARSOF rotary-wing and unmanned platforms to penetrate integrated air defense systems. [INVEST #11]

>> SUSTAIN

Provide force sustainment. Sub-LOE manager: USASOC Deputy Chief of Staff, G4.

INVEST (Long-Term)

» Enabler Careers: Create the system/opportunities to retain enabler personnel in ARSOF for more of their careers. [INVEST #12]

LOE #3: PRESERVE

PRESERVE our force & unique mandate. This LOE focuses primarily on USASOC's responsibility to ensure the personal readiness of assigned Soldiers, Army Civilians, and their Family Members. The USASOC mission statement reflects this responsibility as it identifies the requirement to SUPPORT ARSOF. This requirement, therefore, becomes the single sub-LOE for this section.

>> SUPPORT

Enable & preserve our team & legacy. Sub-LOE manager: USASOC Deputy Chief of Staff, G8.

READY (Short-Term)

» **Health of the Force: Improve ARSOF human/spiritual performance, behavioral health, social readiness, and resilience. Recently added as an objective to represent Preservation of the Force and Family**. [READY #10]

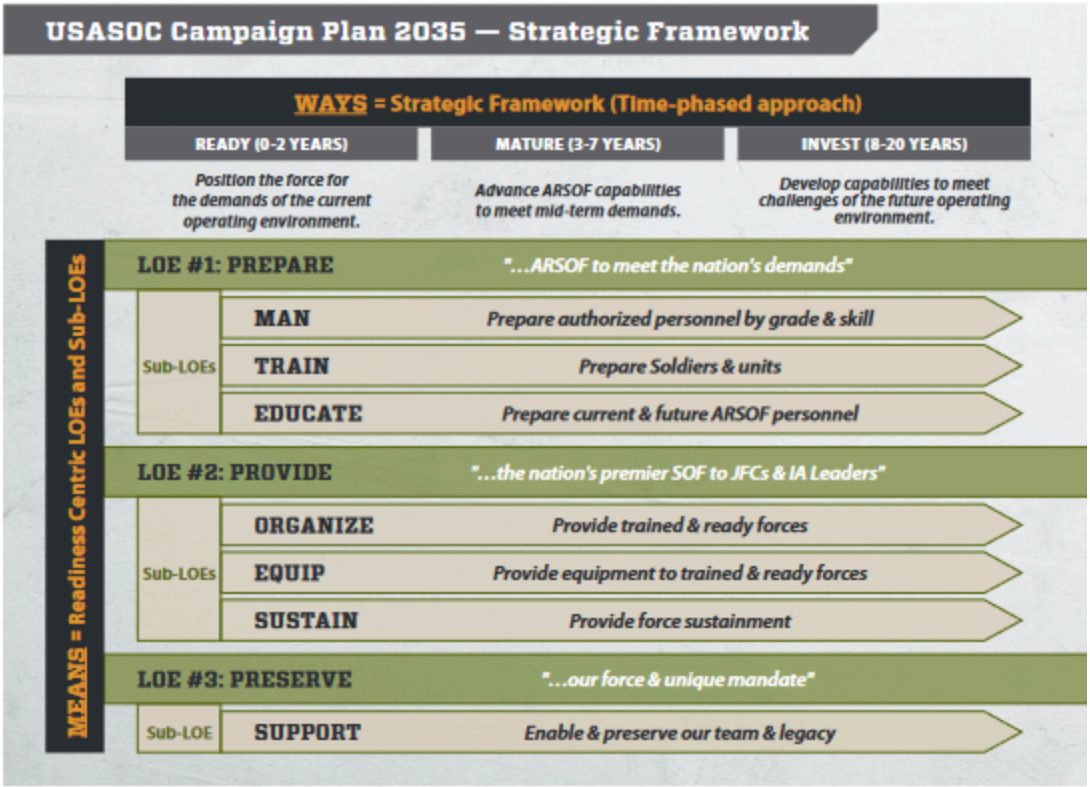
MATURE (Mid-Term)

» Gray Zone Indicators: **Improve ARSOF intelligence collection, analysis, and synthesis capabilities that enable understanding of the Human Domain and provide indicators and warnings for gray zone threats. [** MATURE #6]

» IT Network Integration: Integrate IT networks across organizational/institutional boundaries. [MATURE #11]

INVEST (Long-Term)

» Cyber Defense Tech: Obtain technology to protect friendly networks from advanced Cyber threats. [INVEST #8]



USASOC Campaign Plan 2035 — Strategic Framework
WAYS = Strategic Framework (Time-phased approach)
READY (0-2 YEARS)
MATURE (3-7 YEARS)
INVEST (8-20 YEARS)
Position the force for the demands of the current operating environment.
Advance ARSOF capabilities to meet mid-term demands.
Develop capabilities to meet challenges of the future operating environment.
MEANS = Readiness Centric LOEs and Sub-LOEs
LOE #1: PREPARE
"...ARSOF to meet the nation's demands"
Sub-LOEs
MAN
Prepare authorized personnel by grade & skill
TRAIN
Prepare Soldiers & units
EDUCATE
Prepare current & future ARSOF personnel
LOE #2: PROVIDE
"...the nation's premier SOF to JFCs & IA Leaders"
Sub-LOEs
ORGANIZE
Provide trained & ready forces
EQUIP
Provide equipment to trained & ready forces
SUSTAIN
Provide force sustainment
LOE #3: PRESERVE
"...our force & unique mandate"
Sub-LOE
SUPPORT
Enable & preserve our team & legacy

CONCLUSION

'In an era of uncertainty, ARSOF must continue to provide the nation with a port-

folio of complementary capabilities to address future hybrid threats. USASOC Strategy 2035 defines how ARSOF will evolve to meet the demands of the future operating environment. The strategy outlines the future operational and institutional capabilities necessary to counter threats across the spectrum of conflict. USASOC Campaign Plan 2035 operationalizes USASOC Strategy 2035 and guides the command's capability development efforts. Together, the Strategy and Campaign Plan represent the way forward for ARSOF capability development in an effort to ensure the force remains without equal for decades to come.'

'The successful conduct of IW relies upon unified action with our U.S. interagency and multinational partners. **Our competitors have operationalized clandestine criminal activity and predatory economic behavior as components of their own approach to irregular warfare.** However, structural divisions limit our ability to respond to non-military aspects of adversarial competition.'

'No single U.S. Government department or agency has primacy in the prosecution of irregular conflict or adversarial competition. We cannot assume unified action will occur on its own. We must pursue it deliberately. The persistent and enduring character of IW requires the Department to institutionalize IW as an efficient and effective part of force development and design. Breaking our reactive cycle of investment in IW requires preserving a baseline of IW-focused and IW-capable expertise and tools sufficient to allow Combatant Commanders to perform IW tasks necessary to achieve their campaign objectives. We will prioritize investments in human capital as the primary competitive advantage in IW over our adversaries. Military officers, enlisted personnel, and civilians must receive continuous access to IW-related training, doctrine, and education in order to build shared understanding.'

What we have now evolved to is the SOJTF. 'A SOJTF is a modular, tailorable, and scalable SOF organization that allows the United States Special Operations Command (USSOCOM) to more efficiently provide integrated, fully capable, and enabled joint SOF to GCCs and subordinate Joint Force Commanders (JFC). SOF capacity may be especially challenged during major combat operations or other large scale campaigns. When theater SOF requirements exceed the TSOC's capacity, GCCs may request a SOJTF from USSOCOM. In coordination with the GCC, theater component, and Joint Task Force (JTF) commanders, the SOJTF commander is responsible for planning, integrating, and conducting

special operations in a designated operational area. When tasked, the SOJTF commander plans, integrates, and conducts all military operations in the designated theater of operations.

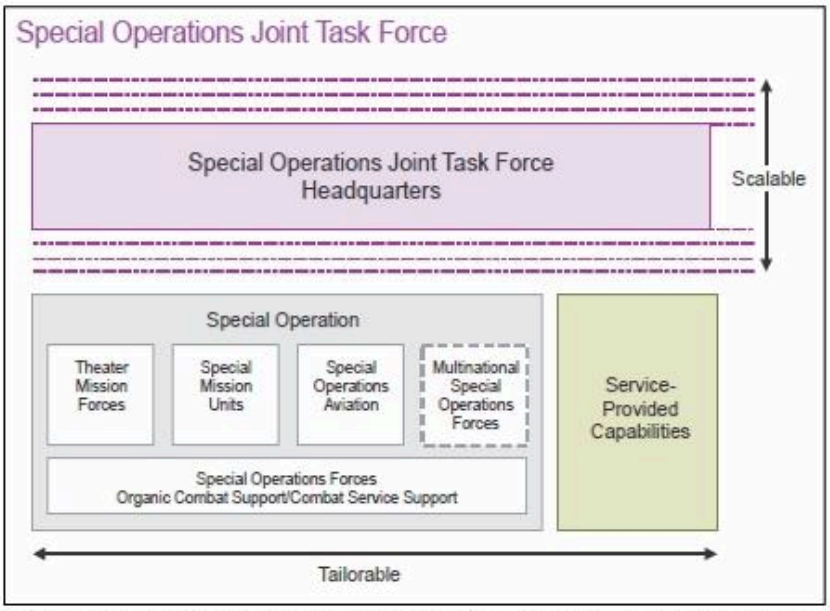


Figure 1. The SOJTF Organizational Construct. Source: Joint Publication 3-05.

A SOJTF is composed of four elements: the headquarters (HQ), SOF operational forces, SOF support forces, and Service and Interagency provided capabilities. The HQ element provides the 5 command and control (C2) of all SOF in the SOJTF. It may augment existing capability, or provide the full theater capability, as required. The second element consists of the SOF operational forces, which may include air, ground, maritime, and special designated SOF capabilities. The third element includes the SOF organic combat support and combat service support capabilities, which may include aviation support, fires support, intelligence, logistics, and communications. Since SOF are limited in size and capability, the fourth element is composed of Service and Interagency provided capabilities.'

'The SOJTF's scalability also allows it to expand into a multi-national force (MNF) as required. Depending on circumstances, the SOJTF may be directed to serve as the JTF, or a Joint Force Special Operations Component

Command (JFSOCC). The SOJTF provides a capability to C2 multiple joint special operations task forces (JSOTFs)7 and a joint special operations air component (JSOAC)8 or a JTF consisting of both CF and SOF.9 JSOTFs and JSOACs are O-6 level HQs whose staff is normally augmented by Service or Interagency personnel.'

'Multi-Domain Operations
Each of the Services are developing concepts to address the expanding nature of the current and future battlefield. This reflects a requirement for mass effects not only in the traditional domains of land, sea, and air but also in space, cyberspace, the electromagnetic spectrum, and the information environment. What the Services are coming to appreciate is that the Joint Force must apply capabilities more comprehensively (earlier, in greater capacity, at lower echelons) and in new ways (faster, with greater agility).10 The emphasis is on rapid operational tempo throughout all domains using a variety of actions to generate confusion and chaos which disorients the enemy and allows the Joint Force to create, and subsequently attack, weaknesses at all levels (tactical, operational, and strategic) while by-passing strengths. '

I have no doubt with these new adjustments our SOF forces can continue to compete and support overseas operations especially with the full support of the U.S. defense industrial base and commitment of the U.S. peoples as a whole. I do firmly believe that China/Russia has subverted our military services by injecting it with WOKE ideology. This thought process has not only infected each service branch, but also our service academies. When I say WOKE I mean "Cultural Marxism". It comes in the form of Diversity, Equity and Inclusion (DEI), and SDG. It also shows in Critical race theory (CRT). If we fire or force retire most of the current senior flag officers down to the rank of Major that should be sufficient to cut out the rot that has infested our military leadership. We may possibly need to strip some of the senior NCO corps of rank until a sufficient amount of American patriotism is adequately restored among the cadre. Again once this process is complete we simply need to replace any marxist language and doctrine that was forced on our service members. Until ample American principles are restored our military could pose a risk to the Republic and be used as a tool against the people it's meant to protect.

In fall of 2021, the Army's Project Convergence wargames hosted the Air Force, Navy, Marines, and Special Operations in a transcontinental scenario – one meant to replicate the vast distances of the Western Pacific and the technological challenges of a great power war.

Project Convergence 2021 goals were to link Fort Lewis in Washington State with Fort Bragg in North Carolina, over 2,000 miles apart. It was a success.

Back in 2020, Project Convergence tied in Marine F-35s with Army ground forces. Its somewhat ad hoc battle network transmitted targeting data from satellites in space to a ground HQ at Fort Lewis in Washington State, to artillery at Yuma Proving Grounds in Arizona, over 1,000 miles. PC21 was successful in linking Lewis and Yuma with White Sands Missile Range in New Mexico – and the 82nd Airborne Division's HQ at Fort Bragg, North Carolina, more than twice as far.

But 2,000-plus miles is still only partway across the Pacific. It doesn't quite get you from California to Hawaii. But it's a decent test of the Army's ability to operate along the strategically located First Island Chain, the series of islands running roughly 2,500 miles from Southeast Asia to Japan.

What's on the horizon for our Army and Joint Services? For starters **Project HADES** is moving forward along with Army Futures Command and INSCOM revamping. The U.S. Army is updating its Unified Network Plan after it has 'far exceeded' current goals: according to the Service network chief. Currently, the Army has nine various organizational networks and is on its way to creating one cohesive network.

The Army eyes late fall for the HADES spy plane work as it waits out the test window. Andrew Evans, the director of the Army's ISR Task Force, gave 'Breaking Defense' , a defense industry newsletter, new details about the Army's plan for the HADES future surveillance aircraft after a coveted contract award.

Raytheon has merged with even more companies and expanded its market share and has several orders to upgrade many different early warning and radar capabilities and several different air and ground based missile systems for many of the service branches. RTX will be upgrading versions of AMRAAM and ASRAMM and the SM-6. They have also offered systems like the "**HEL** system" or High Energy Laser with applicability to many different air, sea, land platforms and vehicles to include the individual warfighter. They offer a plethora of both mobile, ground, space based, offensive and defensive capabilities and support many other critical programs headed by defense contractors such as, the Exoatmospheric Kill Vehicle (EKV) and Ground-based Midcourse Defense Systems or in 2022 a $985M **contract** to develop hypersonic missiles. In 2023 RTX was awarded a $619 million **contract** to continue to produce AN/SPY-6 (V) radars for the U.S. Navy. 'Military commanders and Pentagon officials are pushing for extra funds to speed up the Space Rapid Capabilities Office's Satellite Communications Augmentation Resource (SCAR) program to field modernized antennas for the antiquated Satellite Control Network (SCN), according to Space RCO Director Kelly Hammett.

"There is a significant push for more [funding] currently in discussion with the Congress, with CAPE [Cost Assessment and Program Evaluation office], with others," he told Breaking Defense on Tuesday on the margins of the annual Advanced Maui Optical and Space Surveillance Technologies (AMOS) conference.

Hammett said that though the SCAR program has been in the works for a couple of years, it is being seen as more urgent for keeping satellite communications flowing as top brass have begun to worry more about possible great power conflict with China and/or Russia.'

“In the last six months, the importance of SCAR to the future comms architecture for space has been significantly elevated. Why? It’s recognized that in a time of conflict, the legacy SCN does not have the capacity to be able to see to the necessary assets to fight the fight when when things go from a peacetime footing to a dynamic space operations environment,” he said. “When we shift to that footing, the necessary cadence of commanding and controlling satellites to move, hide, run, and fight goes up significantly.”

Northrop Grumman is a key provider of capabilities that allow the warfighter to connect data, sensors and shooters from all domains to all forces.The Space Force vice wants sats to track aircraft by early 2030s. Tournear said that, ‘the optical intersatellite link demonstration was final success in a trifecta of baseline challenges to SDA's plan to network hundreds of military satellites in LEO, as well as to eventually to integrate commercial satellites into the mix.

One of the key challenges for tracking enemy aircraft from space is that airplanes and drones move much faster than tanks, trucks and ships; confounded by the fact that satellites themselves also move around the Earth extremely fast. ‘Success begets challenges’: NGA struggles to meet rising demand for Maven AI “The number of detections are way up [and] the number of models that we have are way up, [but] with the same level of compute that you had in 2017,” said Vice Adm. Frank Whitworth. “It starts to slow down. We are already seeing evidence of that.”

Northrop has produced a system capable of connecting all systems and forces. ‘The JADC2 connects distributed sensors, shooters and data from all domains to all forces. It provides a decisive advantage to the warfighter by connecting platforms and weapons across a common architecture regardless of service or domain. These modernized military systems, secure networks and communications networking will use new technology and processes to connect people and data to ensure faster, better decisions to enable mission success.’

According to National Defense Magazine,'The Air Force Research Lab is working to advance next-generation air dominance, and its MUTANT program is aiming to significantly increase missile range and lethality against highly maneuverable targets.

The Missile Utility Transformation Via Articulated Nose Technology program, or MUTANT, uses a form of active morphing involving high-rate pivoting of the missile forebody — referred to as articulation — that increases maneuverability without the drag created by additional fins, according to an AFRL fact sheet.'

Lockheed announced a new 'extreme range' version of the JASSM **c**ruise missile. Lockheed is putting its own funds toward early development work on the missile, which could "significantly" expand the missile's reach past the JASSM and the Long-Range Anti-Ship Missile variants currently being produced for the Air Force and Navy, said Michael Rothstein, Lockheed's vice president of air weapons and sensors

BELL/BOEING-AFA 2024 — "Within a few weeks, Air Force CV-22 Ospreys will be ready to deploy for the first time since a fatal Osprey crash in November, the head of Air Force Special Operations Command said today."

About 60 percent of AFSOC's CV-22s are back to being fully operational, with the rest to follow by late 2024 or early 2025, said Lt. Gen. Michael Conley during a roundtable at the Air Force Association's Air, Space and Cyber conference.

The CV-22 units in Japan and the United Kingdom "are almost back to full mission readiness. We will deploy out here in the coming weeks, back to support other geographic commanders," he said. "My whole fleet is not operationally running yet, but I have enough capacity and the right crews training to provide the capabilities on the battlefield."

'**Joining Forces' has always been a critical factor in creating extra strength**. In the future, more than ever before, mission advantage will go to military forces who can coordinate and act together across all domains. **Observing, orienting, deciding** and **acting (OODA)** together, faster and

with greater effect than their adversaries is the next-gen technological edge for Joint Forces. And, whether Joint Forces are across United States military branches including the U.S. Air Force, U.S. Army, U.S. Navy, U.S. Marines, U.S Coast Guard, U.S. Space Force, or in partnership with states, private industry, and our allies—future mission success will lay in highly-effective **Joint All-Domain Command and Control** ***(JADC2)***.'

However, with all the great doo-dads and tools that are built for the military to warfight, if we don't have the enlisted personnel to fill the gaps/billets in personnel loss and to train on the newer weapons systems, the tools kinda become useless. Thus far, our annual recruiting numbers are down by forty percent (40%). This is reflective of several things, but I highly suspect the reasons are mainly because of, setting goals to reduce the number of white males in service, goals of reducing or eliminating whites from the officer ranks, demonization of the caucasian race as a whole, demonization of American Patriotism, labeling certain groups as Nazi extremist, the forced vaccinations during the China virus outbreak, FBI classifying traditional patriotic symbology as a violent extremist indicators, demonization of DJT supporters, public opinion on the reckless departure of Afghanistan, cultural marxism being taught service wide, parents and veterans warning potential recruits that nobody should want to serve under Biden or that new unnecessary war is certain and I'm sure there's much more. Oh did I mention 325k Americans below age 46 perished in the last 6 years due to China, the Mexican cartels, and the fentanyl attack?

First, let's see if the CCP makes an attempt to seize Taiwan as their ambitions for controlling the world start there. Meanwhile, we should recognize things for what they are, acknowledge that our government consistently lies about many narratives via controlled mainstream media, fight the woke (cultural marxist) propaganda, keep our minds fresh with American principles, warn others of this threat, say a prayer or two, but always remaining eternally vigilant of the many threats we face as a nation.

JESSE ROBERT, ATO-II, CAS, CPO

Author FULL BIO

Jesse is currently a third year intern at The Counterterrorism Group, a Paladin 7 and Divera Group company. He is the former Site Account Manager, Anti-Terrorism Officer and Terrorism Liaison Officer for GSOC/Plant Protection operations at Raytheon Intelligence & Space RI &S and Self- Protect Systems in California. He spent 20 plus years as a USG contractor successfully protecting advanced technology, programs, classified national defense information, associated hardware, operations and special programs from acts of, physical theft, IP theft, sabotage, espionage and terrorism, in addition to U.S. government interest. Jesse has a specialized educational background in security cooperation, civil-military programs, investigations, DoD physical security, surveillance operations, anti-terrorism ,counter-surveillance, counter-espionage, surveillance detection & counterintelligence. Jesse is a member of The Institute for the Study of War: Network; The General Jack Keane 'Center for National Security, Maj.Gen. Peter Vallely-STAND UP AMERICA (SUA), The Sovereignty Coalition, Commission: Present Danger China, AUSA,The Civil Affairs Association (CAA), Army Strategist Association (ASA), Center for Irregular Warfare (IWC), The American Civil Defense Association (TACDA), SOL-W, Secure the Grid Coalition, and the Irregular Warfare Global Network. He became a military Cadet at age 15 in the United States Air Force Auxiliary (CAP) attaining the rank of Technical Sergeant, he held senior NCO roles and the positions of Santa Barbara Composite Squadron 131 **First Sergeant** and **Deputy Commander**. He also was in the Cadet Corps in the U.S. Army Junior Reserve Officer Training Corps (JROTC) and held the rank of Corporal earned Expert Marksmanship qualifications 3 years in a row, achieved the Special Forces Association award & Ray Kroc Youth Achievement award among many others. Jesse asserts that he's lived his adult life by following the Cadet Oath & Creed, military principles of leadership and SF Principles . He's currently enrolled at American Military University pursuing a bachelors in Intelligence Operations, Minor in Latin American Studies. He remains as a CT Intelligence Analyst, J.r-Targeter with CTG as he further evolves in the National Security & Intelligence spaces.
